

ASSOCIATED FIREMEN
MEET IN DALY CITY

The Associated Firemen of San Mateo County held their regular meeting last Tuesday evening in the Daly City Hall, there being an unusually large attendance.

Committees of two men from each city were appointed to make a survey of their city's fire apparatus and make a report at the next meeting. It is desired that all fire engines carry fittings for neighboring apparatus, so that in case of a large fire one city may aid another without delay.

A dance committee was appointed to make arrangements for the annual dance at Pacific City.

After the meeting the association members adjourned to the Eagles' Hall, where a joint banquet was held with the Ladies' Auxiliary.

Among the speakers were Trustee A. Bodien, Fire Commissioner Rodenberg, Chief Kennedy, Mrs. S. A. Landini, Mrs. Conroy, past president of the Ladies' Auxiliary of the David Scanlan Club, San Francisco; Mrs. L. Huse, secretary and treasurer of the Ladies' Auxiliary of the David Scanlan Club, San Francisco. Captain M. O'Connor, of the San Francisco Fire Department, sang several songs.

President P. Ross, of the association, spoke on Daly City's water, inviting all present to partake freely of it.

Trustee Bodien claimed that the worthy president looked so young, despite his 95 years, because of Daly City's water, one of our biggest assets.

LADIES' AUXILIARY HOLDS
AN INTERESTING SESSION

The firemen's wives of Daly City entertained the visiting ladies of the San Mateo County Association last Tuesday evening. The ladies were welcomed by Mrs. A. Chesney, president of Company No. 4 Auxiliary. Mrs. Sick, of San Bruno, chairwoman of the County Association, then took the chair and called for the reorganization of the County Auxiliary. The minutes were read by Mrs. S. A. Landini, temporary secretary of the last meeting, which took place at San Bruno on January 19. Mrs. Landini resigned on account of lack of time in carrying out her duties, and Mrs. Grose, of San Carlos, was appointed temporary secretary. Committees were reorganized and several questions answered by the chairwoman. After the meeting a game of whist was enjoyed. There were about a dozen guests from San Francisco and from other parts of the county, making about fifty ladies present.

The men then appeared and all sat down to enjoy a regular supper. The tables were laden with good things, and each guest received a candy Valentine. The decorations were spring flowers and red ribbons. There were 115 men, wives and guests. There were several short talks by officials and visitors, both men and women, who seemed to enjoy the task.

The ladies of Company No. 4 worked very hard to make the evening such a delightful success, but will be unable to attend again as members of the County Auxiliary, as they are expected with home organizations, both civic and social, which take most of their time. This is regretted by the ladies of Company No. 4, as they do enjoy doing all they can for the benefit of the community.

SITE FOR NEW HOMES
PLACED ON MARKET

Jefferson Park is the name of the new tract that is being placed in readiness for home buyers by J. P. Bonds and Dr. C. L. Dixon.

Jefferson Park is located just south of the Jefferson Union high school. An office has been erected at 7100 Mission street and work will begin at once upon the improvement of this property which will mean a substantial addition to the population of Daly City and Colma.

The men who have purchased this tract and will put it on the market are J. P. Bonds, a Los Angeles and Pasadena real estate man, and Dr. C. L. Dixon, county health officer of King county, Washington, both of whom believe they have made a profitable investment and that they will have no trouble in disposing of the property.

According to their plans, Station and Bruno avenues and Cavour and Moltke streets will be at once paved through their property, and water, gas and electricity provided for.

This will be a restricted district, no homes being permitted to be erected below a cost of \$3,500. As this site is an ideal one, it is expected many fine homes will be erected.

PRESBYTERIAN MINISTERS
EXCHANGE PULPITS SUNDAY

The Rev. James M. McElhinny, of Centerville, and the Rev. Charles H. Gatchell, of the Grace Presbyterian church, exchanged pulpits last Sunday, which proved an enjoyable arrangement to both pastors and members. Mr. McElhinny's talk to the Sabbath school was much appreciated, and much favorable comment has been heard about the evening sermon. A welcome awaits him should he visit Grace Presbyterian again.

The Sunday school race around the world proves to be very close, and both sides seem determined to win. By hurrying some, others may yet join in this class.

The Girls' Club met in the manse on Tuesday, holding the regular business meeting, followed by a social hour of games and contests. A tureen dinner was served by the committee, revealing many delightful surprises. Valentines were exchanged and Mrs. Wagner and Mrs. Gatchell, the honor guests, got caught in a heavy shower of Valentines.

The Boys' Club will meet at the appointed hour Monday.

Mr. Gatchell has returned and will have charge of the church service next Sabbath.

METHODISTS PREPARING
FOR ANNIVERSARY DINNER

"English Shrines," or "How Christianity Came to Our Forefathers," is the subject of an illustrated (stereopticon) lecture to be given at the local Methodist church next Sunday evening, February 21, at 7:30. The scenes are of unusual beauty. They represent the progress of Christianity down through the ages. Mr. McClintic secured the lecture especially from the headquarters of the Congregational church in San Francisco.

Last Sunday evening the pastor spoke on the subject "The Larger Faith." He pointed out the special contributions of each main denomination to the larger faith. He spoke of the government of each church and of its special service to humanity.

The church is looking forward to a great anniversary dinner and celebration on the night of Friday, February 26. Tickets are 50 cents for adults, 25 cents for children. All are invited. Mr. and Mrs. Henry W. Waltz will sing.

COMPANY NO. 4 AUXILIARY
ENTERTAINED BY PRESIDENT

Mrs. A. Chesney, 298 Crocker avenue, called a special meeting of the Ladies' Auxiliary of Company No. 4, Daly City Volunteer Fire Department, Friday afternoon, February 12, at her home, and after much business had been transacted, dainty refreshments were served by the new president of the Auxiliary. Mrs. Chesney has laid plans for a very interesting as well as beneficial year for the organization and the wives of the firemen of Company No. 4 are planning a lot of surprises for the members in the way of social affairs.

The ladies of the Auxiliary have made up their minds to give their time to home affairs, and make this year a very successful one, instead of branching out over the county as heretofore planned. Those interested in Auxiliary work wish the new officers success in their efforts.

THREE GIRLS ON HONOR ROLL

Last Monday students of Jefferson Union high school received their report cards, and only three girls were on the Honor Roll. They are Elizabeth Newell, Evelyn Smith and Anna Tromberg.

The twenty-five students that received College Recommendations were Charles Aiello, Helen Anderson, Albert Belli, Margaret Bull, William Butow, John Gustavino, Ralph Hammer, Eva Johnson, Willie Jost, Gerda Kock, Francis Koskinen, Violet Lagomarsino, Isabell McDonald, Fred Millhauser, Roberta Murray, Paul Passaglia, Adell Price, Viola Rehaume, Mildred Swan, William Sweeney, Mabel Vireno, Marie Walker, Clark Williams, Beulah Womack, Martha Worst.

MAKE GIFT TO BOY SCOUTS

It is announced that the Crocker-Pershing Parent-Teachers' Association has donated \$5 to the Boy Scouts fund. Daly City's quota is \$100, in their drive for field instructors. This is a wonderful organization for boys who will become America's richest asset, and are now the most important of our American problems in knowing how to make the best citizens. The Boy Scout organization solves the question, for no boy can be a good Scout and be a poor citizen. Help the good cause along.

CITIZENS ADVOCATE
SHACK ELIMINATION

A very interesting meeting took place last Tuesday evening at the City Hall. A number of active citizens of Daly City met with the board of trustees to discuss one of the most vital questions facing us at present. The board, in conjunction with the citizens, is endeavoring to devise ways and means to further eliminate and discourage the presence of unsightly and in most cases unsanitary shacks in this community.

This city has progressed from its shacks of pioneer days to more modern and up-to-date places in which to live. And in order to encourage investment and home-building, and promote property value, it is absolutely necessary to clear the community of these shacks.

We can not expect to invite people to invest and help to enlarge this city with the presence of these disgraceful looking fire-traps.

The future of this city will depend entirely on the stress we employ to eliminate this condition.

Future meetings will be held to promote a greater interest among the citizenry, and arrive at a definite plan of disposition of this lamentable state of affairs.

Your co-operation is invited to help promote your welfare in this critical condition, and it is your duty as a loyal citizen to respond with some action to assist the board to go ahead with this excellent opportunity for progress.

GIRL MEETS DEATH
IN AUTO ACCIDENT

Ida Stafford, 17-year-old Redwood City girl, was instantly killed, and Francis M. Bridges, 19-year-old Palo Alto student, perhaps fatally injured early last Sunday morning, when the automobile in which they were riding home from a dance with another young couple plunged over a 75-foot embankment near Saratoga. The car was driven by Edward Ryan, of Redwood city, who suffered minor injuries. Miss Devere Dupont, of Menlo Park, who was sitting in the front seat with Ryan, was unhurt.

The car rolled down the embankment and stopped at the brink of a deep creek swollen by the rains. The four victims were pinned beneath the car, but Miss Dupont proved the heroine of the occasion. Wriggling out from beneath the overturned car, she made her way up the steep and muddy bank and summoned help.

HARRY COURT GOES
TO SAN QUENTIN

Harry Court, sentenced to from one to ten years for manslaughter for running down and killing Fred Ho-kamp, aged 13, when his automobile struck the boy, is now in San Quentin, serving his sentence. Court was taken to San Quentin, shackled to Arthur Comisky, convicted burglar. Sheriff T. C. McGovern took the prisoners to the state prison. Court made no statement before leaving for prison, and there were no friends present to bid him farewell.

SPEEDING AUTOISTS CAUSE
ACCIDENTS ON HIGHWAY

Constable S. A. Landini was right on the job this week. Last Tuesday night two young men, traveling at a high rate of speed, turned their car over when they attempted a sharp curve at Baden Crossing, and were severely injured. Constable Landini took them into the San Francisco emergency hospital. Another accident occurred in the "bottle neck" Monday when an unidentified driver of a Buick struck a large Paige. Both machines were wrecked, but there was no one injured. Constable Landini supervised the clearing of the highway so as not to delay traffic.

MISS SAMPSON ENTERTAINS

Miss Frances Sampson was the hostess at a party last Saturday night at her home on Vendome avenue. The evening was spent in dancing, music and games. A midnight supper was served by Mrs. Sampson. Those present were: Kathleen McKendrick, Josephine Jensen, Francis Stark, Oriole Fischer, Henrietta McKeown, Evelyn Smith, Harold Fischer, David Gehringer, Harold Purser, Chester Smith, Albert Saarinen, Albert Belli, Lawrence Vireno, Winston Baargehorn, and Edward Devincenzi.

Plead Guilty to Booze Charge

Joe Zainelli, hotel keeper of Moss Beach, and Mateo Orsi, a barber of Half Moon Bay, pleaded guilty to a charge of violating the Wright act, before Justice Griffin at Redwood City. They were arrested by federal dry agents Wednesday of last week.

NEW PLAN TO SMASH
COLMA BOTTLE NECK

A new plan to smash the Colma "bottle neck" was presented to a conference of city, state and railroad engineers in the San Francisco city hall last Tuesday afternoon by Colonel John Skeggs of the State Highway Commission.

The plan avoids the necessity of using part of the land of the Cypress Lawn cemetery for the tracks of the Market Street Railway Company, and may be favored by all interests.

The project, as outlined at the meeting, calls for the construction of two one-way highways, forty feet wide, running from a point below Cypress Lawn Cemetery to above Colma, a distance of two and one-half miles.

The Market Street Railway tracks, under this plan, would be placed in the center of the two highways as a dividing mark, and automatically creating the one-way highways. The railway would be allocated a 28-foot right of way.

In addition there would be two eight-foot sidewalks, one on each side of the highway, to accommodate the pedestrian traffic.

No details were forthcoming as to the manner in which the grade crossing that would be created would be overcome.

No action will be taken, however, until the cemetery people have had a chance to give their approval to it. The former plans have been held up by objections of the directors of the Cypress Lawn Cemetery Association, who were reluctant to give land for a railroad right of way. Under the plan proposed Tuesday, this would not be necessary.

Question: My set, a five tube tuned radio frequency, squeals a great deal. How can I stop this?

P. R. Answer: To satisfactorily end this the set should be overhauled, several condensers added, and the panel shielded. However, the following are several hints which will reduce this and often stop it entirely with no change in the set. Your set works loudest at the point of oscillation, i. e. when your set squeals. You should not allow your set to operate at this point, as it acts as a miniature transmitter, ruining all nearby reception. Moreover, it distorts the quality of your set. Operate the set just below the point of oscillation by this method. Tune in a station with the rheostats well on. Allow the squeal to squeal its loudest by means of the three tuning dials. Now turn the amplifier rheostat down just past the point where the oscillations cease. You may also lower the detector rheostat. You will thus conserve tubes and batteries (both "A" and "B"), have a better quality and will rid the neighborhood of a "radio nuisance." The "B" battery detector voltage should be about 18-22½. It may be necessary to increase the filament voltage of the amplifiers, by means of raising the amplifier rheostat, for distance reception. We consider this one of the most important questions in radio and feel justified in taking so much space for it.

Question: What causes rattling in a cone speaker?

M. S. Answer: Rattling may be due merely to an attempt to overload the speaker. A 12 or 14 inch speaker will handle a reasonable volume. If you desire to entertain the entire community, purchase a 72-inch speaker. By the way, we saw one of these giant 6-foot diameter speakers down in Burlingame last week, and they sure are a beautiful job. Some tone, too. Use fewer tubes or lower the rheostats. At high frequencies (a high note) a cone speaker is apt to rattle somewhat. This can not be overcome without undue expense of a supplementary speaker. A cone speaker handles the lower and middle notes excellently, and a good horn or cabinet speaker will care for the high and middle notes well. By connecting a cone and an ordinary speaker in series a most excellent tone may be secured. This rattle at high frequencies is not disturbing ordinarily. Usually the rattle is merely an overloaded speaker, as mentioned in the first part of the answer.

Address all inquiries to the Radio Editor, Daly City Record, 6500 Mission street, Daly City, or to Marc Worst, Colma. All questions or articles are welcomed. Acknowledgment will be made of all articles.

Annex White Oaks to San Carlos

By a vote of seven for and three against, resident property owners of White Oaks have voted to annex that community to San Carlos. White Oaks is a new subdivision lying just south of San Carlos.

SOUTH CITY IS REFUSED
AID BY THE GOVERNMENT

That the development of South San Francisco as a harbor will be greatly retarded as a result of the unfavorable report submitted to Washington by the army engineers, is the opinion expressed in South San Francisco and in shipping circles in San Francisco, which were interested in pushing that development work.

Dispatches from Washington stated that the engineers had reported to the house of representatives that the army would oppose any expenditure for funds for further development of the harbor.

E. C. Peck, new president of the South San Francisco Chamber of Commerce, takes exception to the portion of the report of the army engineers which stated that "no definite information was presented to show extensive industrial expansion or other pressing needs for a deep channel to South San Francisco."

"South San Francisco now has twenty-six major industries," said Mr. Peck in his statement. "Several of these are the largest west of Chicago. We are certain that many more big industries will take advantage of the low cost of industrial sites available in South San Francisco just as soon as a deep water channel is obtained."

The army engineers found, according to their report to the house of representatives, that there already exists a channel with a minimum depth of 26 feet leading into South San Francisco. The peninsula city is seeking to have the federal government increase this depth to 30 feet, which would permit the largest ocean carriers to load at South San Francisco docks.

WORK OF STATE
TRAFFIC OFFICERS

California state traffic officers operating under the direction of the Division of Motor Vehicles listened to 247,003 explanations from perspiring motorists of why they were going too fast or otherwise breaking the law during the year just past.

A report of the year's activities of the officers, filed Monday by Chief Inspector C. K. Harder with Will H. Marsh, chief of the division, shows this number were stopped on the highways during the year. Of these the officers put 65,944 under arrest at once and ordered them to tell it to the judge. They told 117,541 to have their lights adjusted, charged others with various offenses, and released others after a warning.

In their excursions on motorcycles after violators the officers covered almost three million miles—the equivalent of 120 trips around the earth.

The delinquent fees collected by the officers amounted to \$125,933.05, and they were responsible for fines totaling \$382,398.23. These sums were approximately \$150,000 greater than the salaries paid the officers.

During the year five officers were killed in line of duty and more than a dozen injured.

In San Mateo county 7,312 violators were stopped; 6,976 were arrested; the delinquent fees amounted to \$411; fines amounted to \$8,729; and the mileage covered by the officers totaled 112,340 miles.

FEDERAL AUTHORITIES
RAID COASTSIDE RESORTS

Federal dry agents, headed by Col. Sam I. Johnson, raided five hotels and road houses in the Half Moon Bay district, Thursday night of last week, seized a quantity of liquor and placed four men and one woman under arrest.

The dry raid started at Half Moon Bay, where the barber shop of Mateo Orasi was entered, and a quantity of liquor found by the officers, it is said. After leaving town the dry squad went up the coast highway in a northerly direction and arrested the following at various road houses: Harry Sunnen, Alonzo Woodside, Joe Gallelli and Marie Crowley. They were released on bail and must appear in federal court in San Francisco.

JAMES L. FLOOD PASSES AWAY
AT HOME IN MENLO PARK

James L. Flood died at his home in Menlo Park at 7 o'clock last Monday morning, after an illness of more than a year. James L. Flood, one of the wealthiest men in California and the son of James C. Flood, who amassed great wealth during the bonanza days of Nevada, owned the Flood building, one of the finest business blocks in San Francisco, and was interested in many banks and other financial enterprises. He was 72 years of age. The Flood estate, "Linden Towers," near Menlo Park, is one of the most extensive and beautiful in the country. It was planned and constructed by James C. Flood in 1875.

SUPERVISORS REJECT
HEALTH BOARD PLAN

Further consideration of the proposal to establish a county health board was indefinitely postponed the meeting of the county board supervisors at Redwood City on Monday, on motion of Supervisor Thomas Hickey, seconded by Supervisor C. Thompson.

Dr. W. C. Chidester of the Memorial hospital appeared personally before the supervisors in behalf of the plan to organize a full time county health board at an estimated cost of \$8,000 a year to the county. The amount it was proposed to be appropriated to a general fund combining an allowance from the state board of health and the Rockefeller Foundation, the entire amount to defray the cost of the proposed county health board. Dr. Chidester pointed out that it would require a considerable period of time for the organization of county health board, and indicate that the amount asked of the county would not be required immediately.

After Dr. Chidester made his talk, Supervisor Hickey said that he had sounded out public sentiment throughout the county on the proposal and found the sentiment so much opposed to it that he could not favor it.

Chairman John MacBain said that he did not think the time appropriate to make any appropriations toward the establishment of a county health board, and went on record as opposing the proposal at this time.

Supervisor Rosalie M. Brown suggested that a deputy health officer could be appointed to help out the present health officer if an emergency warranted it.

Norman Rushton, of Burlingame appeared before the board with a request that a part of Memorial Park be set aside for a permanent Boy Scout camp for San Mateo county Boy Scouts. The board decided to confer with the Boy Scout officials to pick out such a site.

The county milk inspector requested that the county milk ordinance be amended so as to give him power to revoke the license of violators of this ordinance. The request was referred to the district attorney for his consideration.

The proprietors of Babylon, who had been cited to appear before the supervisors and show cause why Babylon's license should not be revoked, failed to make a personal appearance, but they sent a courier to surrender the license.

The memorial bronze tablet which has been ordered placed in the court house in memory of the late S. M. Menzes, San Mateo county pioneer, was ordered placed on the first landing of the main stairway in the county court house.

ELECTION ORDER
PROTEST IS FILED

Charging that numerous signatures on the recall petition recently circulated in South San Francisco against Mayor H. F. McNellis and members of the board of trustees were fraudulently obtained, Leo R. Friedman, special attorney for the respondents, and A. J. Scampini, city attorney, have asked for a rehearing on the recent order of the court that a writ of mandamus issue to compel McNellis and his associates to hold a special election for their own recall.

PLAN MOTOR BUS LINES FOR
SAN MATEO AND BURLINGAME

To cope with the growing transportation needs of the community, motor bus lines may be established in San Mateo and Burlingame. Tentative plans to provide this service in the two cities are now going forward and in the not far distant future residents of San Mateo and Burlingame may be riding to and fro in modern motor-buses. It is the plan to establish the service first in Burlingame and then give San Mateo a similar system, it is asserted by William S. Wollner, who has applied for a franchise to start the bus line in Burlingame.

DUMBARTON BRIDGE TO BE
COMPLETED BY AUGUST

Two more steel spans of the nine-span Dumbarton bridge were placed in position during the past fortnight, and with the fifth and sixth spans scheduled for placement within the next two weeks, the bridge finally is assuming form, with the possibility that it will be ready for use early in August.

Pescadero Ranch Hit By Cyclone

A small cyclone struck the ranch of Elbert R. Pinkham, nine miles below Pescadero, last Friday night and did considerable damage, according to reports from that community. The roof of the barn was torn off, a large tree was uprooted and two silos were brought crashing to the ground.

Providential Possession of a Network of Great Natural Waterways

By HERBERT HOOVER, U. S. Secretary of Commerce.

OUR agriculture is based upon higher standards of living than those of our foreign competitors. If we would maintain these standards, we must omit nothing in the economies we can bring in transportation. Every cent we can save in transportation to the market is an addition to the income of the farmer and an assurance that we can maintain these standards in agriculture. No one can contemplate the past and the future of our country without an earnest prayer that we shall maintain at all times the refreshing force of a strong farm population in our national life.

Nor does this problem extend to agriculture alone. For if we would provide our manufacturers and our workmen with the most economic assembly of their raw materials, which they must receive from all parts of the world, and if we would provide for them the cheapest access to the markets for their finished goods, we must also secure to them the cheapest transportation.

The providential possession of a network of great natural waterways, the advance of engineering science which renders feasible their utilization to the cheapest form of transportation for primary goods, the moderate capital outlay required for so reproductive a work, the increased economic strength of our nation places us in a new era in this great project, and it bids that we provide for the increasing traffic of our country; that we set in motion the economic forces that will tend to a better distribution of our increasing population and the wider diversification of our industries, and, above all, that will contribute so greatly to overcome the difficulties of our farmers.

Approximately 5,000,000 Radio Set Owners in the United States

By ORRIN E. DUNLAP, JR., in New York Times.

The outstanding radio development in 1925 was the advancement in transmission and reception of waves under 75 meters in length. Five other prominent milestones which 1925 will leave on its record are the improving of the tone quality produced by receiving sets; the stabilization of the industry; the winning over of world-famous artists to broadcasting; the improving of transmission, especially the usage of higher power, such as in the 50-kilowatt plants at Schenectady and Bound Brook, N. J., and the invention of a combination photoelectric cell and vacuum tube, which is likely to lead to more rapid development of television and radio motion pictures.

The passing year leaves a record of approximately 5,000,000 radio set owners in the United States, about 600,000 of whom are on farms. There will probably be 2,000,000 set owners added to the invisible audience during the next twelve months. The market has scarcely been scratched and the saturation point is far from being in sight. There are about 550 broadcasters in the United States.

The sales volume of 1923 in the radio industry was estimated at \$15,000,000, and a survey of the field this year shows a total estimated of \$350,000,000. Indications are that the sales within two years will reach \$500,000,000, according to leaders in the industry.

One-half of the Lawyers in the Country Are Parasites on Society

By DR. HUGH MILLER, George Washington University.

Due acknowledgement should be paid to the legal profession for its services to civilization in the past and to the high-minded and efficient members of that profession today. The profession as a whole, however, is all out of joint with the requirements of our present-day civilization. So much so that I believe that one-half of the lawyers in the country are parasites on society and perform no useful service.

To explain this let me say that congress, composed mostly of lawyers, paid by the public \$10,000 a year, spend their time passing laws which they violate themselves every day, together with a large part of the population of the country. Other lawyers employed by individuals and corporations earn \$50,000 a year and upward by trying to interpret or evade the laws which the first group of lawyers have passed.

In other words, the legal profession, by reason of its control of political and economic machinery, are playing both ends against the middle and are fattening themselves at the expense of the public. Moreover, lawyers as a rule talk too much and act too slowly for modern conditions. Engineers proverbially talk little, but act quickly and efficiently.

Our Young People Have Certainly Emerged From the Age of Authority

By DEAN HERBERT E. HAWKES, Columbia University.

Our young people have certainly emerged from the age of authority, whether parental, social or divine. Each is master of his own destiny in an anarchy of individualism. It is high time that some one who possesses the vision clears the way for the next step, which is in sight. So far as our students are concerned, the slate is wiped clean for a consideration of religion.

The most striking feature of our young people is not their interest in religion, but their ignorance of it. With the falling away of home training in religious matters, our students have no idea what it is all about and they are interested to find out.

The man who is ignorant of and is not interested in religion is in the same class as the man who is not interested in science, or art, or the natural sciences. We do not frame our curriculum for those exceptional or imperfect minds who have blind spots, but rather for the normal mind that is anxious to obtain a well-rounded education.

It Has Often Been Flippantly Stated That Man Created God

By RABBI ABBA HILLEL SILVER, Cleveland, Ohio.

It has often been flippantly stated that man created God. There is, to my mind, a profound meaning beneath the surface of this phrase. Man is so fashioned that he must create a God idea; without it, he cannot exist. Man needs God in order that he may have a sense of at-homeness, of belonging in the universe. Man would feel utterly lost, lonely and helpless but for the consciousness that there is in this vast scheme a unifying purpose and that he is in some way allied with it, an essential link in the chain of universal purpose. Man needs God in order that he may have a sense of dignity in life. Man's body is weak; his senses are faulty; his life is brief; his existence and his experiences would be altogether humiliating were it not for the faith that, in spite of the inadequacy of his physical and intellectual equipment and in spite of the brevity of his life, he is, somehow, co-working with the great Creative God in the fashioning of the world.

CALIFORNIA NEWS BRIEFS

Santa Cruz is to be featured in the future as the "home of the turken," a cross between a turkey and a common hen. As the result of an article that appeared recently in many newspapers throughout the country through a national syndicate, Postmaster Fred R. Howe of Santa Cruz states that he is receiving an average of ten letters daily from people all over America seeking more information about the fowl. Many of the letters, he states, are enclosed with checks and money orders paying in advance for eggs at \$8 per setting. The father of the fowl is a turkey gobbler and the mother an ordinary common hen.

Contracts were let recently by the Pacific Fruit Express for 5,043 new refrigerator cars costing approximately \$16,000,000. This was announced by G. W. Luee, freight traffic manager of the Southern Pacific company, who says the contract is the second largest in the history of the company. Deliveries of the cars will start May 1, and will continue until July 31, before the Pacific Coast fruit shipping season opens. This contract will increase the number of cars of the company to 38,373. The equipment has increased 155 per cent since 1920 in the endeavor of the concern to keep abreast with the fruit industry.

Declaring that "blanket" forms of approval will no longer be given agricultural land colonization projects, which the State Real Estate department is called upon to examine, State Commissioner John R. Gabbert announced that he has prepared a form calling for specific investigation of the various features of each project. He also said that every certificate issued by his department will include a warning that prospective land buyers should make personal investigations before purchasing and that the certificate is "not a guarantee that all the conditions shown herein will be permanently maintained."

The flapper is not dumb by any means, her critics to the contrary notwithstanding. If the state department of education's 1925 records on scholastic accomplishments of students of both sexes constitute a fair gauge of the situation. Those records indicate that the California flapper's masculine counterpart shows less intelligence in the classroom than she does. Compilations disclose that 35.02 per cent of the school boys in the state were retarded in their studies during 1925 as compared with only 28.42 per cent of the girls.

The generous rain which visited the hill country in Tulare county recently will be a boon to the stockmen in that it will speed up the growth of feed already well started. While the rains upon the lowlands may not have been as generous as desired, nor the snows in the higher levels as heavy as needed, a fine rain was recorded in the hill country between the 1,500-foot and the 6,000-foot elevations and the results have already begun to show.

J. M. Arburua, 83, of Fresno, one of the earliest settlers of the Los Banos district following American entry, died on his 23,000 acre Spanish grant ranch recently. He came to California via Cape Horn in 1866, and four years later purchased the 23,000 acre grant near here known as the Carricallito grant. This hold has been kept intact to the present day and the farm activities are carried on by his sons.

What is believed to be the oldest official record book still in use in the state is to be seen in Sonora, Tuolumne county, in the office of the County Recorder William F. King. It dates back to August 14, 1850, and a wealth of early-day information is contained in its pen-written pages, now faded with age. During the 75 years it has been used 402 pages have been filled with documents.

California canines constitute a distinct source of governmental revenue, and the presence of poodles, terriers, Airedales and other breeds in this state increased city and county income by \$150,480.71 during the last year, it was announced, recently by the state controller. San Francisco and Oakland alone collected canine tax fees totaling \$14,354 and \$7,411.25 respectively.

The Feather river was pointed to with suspicion recently by Oroville, Butte county, prohibition officers following the discovery in the river of a large liquor still. Observers of the high water in the river saw a large still floating down stream. It had been carried away from some moonshiners gully by flood waters.

Will F. Moorish, Los Angeles, president of the California State Board of Prison directors recommended the appointment of a crime commission as a means of solving the crime problem.

The Montague Irrigation district at Montague, Siskiyou county filed an application with the state division of water rights recently for diversion of five second feet of water from the Little Shasta river in Siskiyou county. The purposes of the diversion are stated as industrial and domestic.

Voting unanimously to hold a Stanislaus county fair in 1926, representatives from the various organizations and communities in the county met at Modesto, recently and appointed a committee to appear before the board of supervisors and ask for a \$10,000 appropriation for that purpose.

Dedication of the new home of the First Baptist church of Taft, Kern county, took place recently.

Plans are being laid for the twenty-seventh annual Santa Clara county Blossom Festival to be held in Saratoga, this spring.

A choral society, which proposes to put on several programs during the year has been organized in Truckee, Nevada county.

Paving and other important municipal matters came before the Hanford, Kings county, trustees at their regular meeting recently.

Dairymen from all points of California gathered at the College of Agriculture at Davis recently when the ten-day short course was given.

Announcement has been made at the University of Santa Clara, at Santa Clara, that the diamond jubilee of the university will be celebrated on May 30.

The annual meeting of the stockholders of the Lassen Lumber and Box company of Susanville, Lassen county, was held in San Francisco recently.

Efforts to bring the 1928 convention of the American Federation of Labor to Sacramento are being made by the Sacramento Federated Trades Council. It was announced.

Women of the Tulare county farm bureau have organized a home demonstration association with Mrs. E. A. Hesseltine, Tulare, president and Mrs. W. B. March, Ivanhoe, secretary.

A bullet proof windshield and armored equipment for the front end of Sheriff Elmer H. Gum's car of Auburn, Placer county was ordered at a meeting of the board of supervisors recently.

Enlargement and improvement of the Hotel Maywood at Corning, Tehama county, on a large scale has been started. The lobby is to be doubled in size and sleeping apartments added.

Building permits in Tulare, Tulare county took a decided upward trend toward the close of January, bringing the month's total up to \$20,833, was shown by figures in the office of the city clerk.

With the interior decorators already at work on the structure, Roseville masons, at Roseville, Placer county, are making elaborate plans for the dedication of their new temple about the first of April.

Merced, Merced county, police officers engaged in the hazardous game of chasing criminals will be afforded maximum protection by a specially-built automobile introduced into the service by the sheriff's office recently.

Plans are being completed for the erection of a two-story reinforced concrete theater and office building in Tulare, Tulare county. The structure will have a seating capacity of about 1,400 and the approximate cost is \$250,000.

Several hundred leaders of the California W. C. T. U. are planning to gather in Grass Valley, Nevada county, on March 25, next, to place a bronze tablet in the church where in the original society of that name was organized on March 25, 1874.

Life diplomas for Mrs. Minnie E. Lester, Mrs. Pearl Shaw and Miss Helen Barber, and elementary certificates for Misses Irene Willis and Irene Misenheimer, at Hanford, Kings county, were recommended by the county board of education recently.

The Golden Eagle hotel, an important hotel in Redding, Shasta county, is to be enlarged by making a three-story addition. There will be between thirty and forty guest rooms, with a bath in every room. Sample rooms will be provided in the basement.

County roads which have not been declared by the legislature to be state highways cannot be taken over for maintenance by the state highway commission. This ruling was made recently by Attorney General U. S. Webb in an opinion to Benjamin J. Jones, district attorney of Lake county.

Faced with the early need for expensive improvements or even entirely new buildings in their respective districts, the four rural school communities of Walnut Grove, Manzanillo, Laurel and Enterprise, in Tulare county, are considering consolidation and the building of one school house.

Ed. E. Leake, veteran editor of Woodland, Yolo county, who is said to be the oldest active newspaper reporter in northern California, celebrated his seventy-sixth birthday recently. Leake who devotes a part of each day to reportorial work started his seventy-seventh year "pounding out copy."

A force of 3,100 men is being worked six days a week by the Southern Pacific shops, in Sacramento, in an effort to complete a wholesale job of locomotive and car construction by June 1. The shops are now working on eighteen large mountain type engines and 500 box cars, with the prospect that an additional order will shortly be placed here.

Mrs. Arlita M. Winans, widow of J. L. Winans, one of the best known of the pioneer residents of Petaluma, Sonoma county died here. She was born in Michigan, and was aged 83 years. Her husband was prominent in the Anletam Post, G. A. R. and she was at one time department president of the State Woman's Relief Corps.

Power to cure the ill by the "laying on of hands," is claimed by Luther Burbank, plant wizard of Santa Rosa, whose recent announcement regarding his views on religion caused a sensation.

(© 1926, Western Newspaper Union.)

"Walk the Plank!"

AROUND the profession of piracy there have grown up many a legend, many a tradition which have more foundation in fiction than in fact. One of these is the belief that the pirate leader invariably made his victims "walk the plank." As a matter of fact, this practice was comparatively rare among the pirates of whom we have any authentic record and so far as is known the only one who actually did it was Capt. John Derdrake or "Jack of the Baltic," a Danish pirate of Copenhagen.

Derdrake began as a carpenter in the king's dockyard in Copenhagen from which he was dismissed for drunkenness. He made a few voyages to London as a ship's carpenter and then, upon falling heir to 10,000 rix-dollars, he built a fast brig sheathed with copper in which he carried lumber between Norway and England. But the profits were small and Baltic Jack offered his services and ship to Peter the Great of Russia. They were accepted and he became master shipwright in the royal dockyard at Neva. One day in a fit of anger he killed one of his superiors with an ax and immediately fled aboard his ship and sailed for London to escape the wrath of Peter the Great.

In London he armed his vessel with 12 guns and sailed for Norway. On the way he was attacked by a Russian man-of-war but defeated it and took possession. By this time he had definitely decided upon a career of piracy so he gave his new vessel the awe-inspiring name of Sudden Death and set out to plunder the Russian and British shipping. His prizes were many and he found a ready market in Sweden where the rule was no questions asked and cash on delivery. To make sure that his trail would be hard to follow Derdrake adopted the practice of drowning all prisoners by making them walk the plank and for a long time he was successful in making his captures without much trouble afterwards.

Then one day he attacked a Swedish vessel whose captain and crew escaped in a long boat and hastened to spread the news. The governor of St. Petersburg offered a reward of 4,000 rix-dollars for Baltic Jack's head.

Soon afterwards Derdrake captured a Russian ship upon which the governor's sister was a passenger. After reproaching her for her brother's doings, the pirate leader cruelly stabbed her to death in the back. But this was too much for one of his sailors. This pirate shammed sickness and was put ashore by the captain. He immediately went to St. Petersburg and betrayed the hiding place of the pirates. Two ships were dispatched to capture them and, although Derdrake himself escaped at the time, his whole crew was captured and hung up on hooks alive to die miserably. Fourteen years later Derdrake was seen in Stockholm by the captain of the Swedish ship who had once escaped from him. The pirate was arrested, tried and hanged.

Doctor Dover's Busy Life

PIRATES' life was, of necessity, one filled with action, but it is doubtful if any of the brethren of the coast ever had a more varied career than Dr. Thomas Dover. He was educated at Calus college, Cambridge, England, where he took the degree of bachelor of medicine, after which he practiced his profession at Bristol. Then in 1708 some adventurous streak in his character asserted itself and he sailed from Bristol with Capt. Woodes Rogers in two ships, the Duke and the Duchess, on a privateering cruise in the South Seas.

Although Doctor Dover knew nothing of navigation he insisted upon being placed in command of one of the ships and apparently made good at the new job from the start. Soon after they had rounded Cape Horn they observed a light on the Island of Juan Fernandez and Dover went ashore the next morning. There he discovered the lone inhabitant of the island, Alexander Selkirk, the original of Robinson Crusoe.

Soon afterwards Rogers and Dover overhauled a Spanish ship, took possession of her and rechristened her the Bachelor. Dover was put in command and in April, 1709, he sacked the city of Guayaquil. Some of his crew fell victims to the plague from sleeping in a church where some bodies had recently been buried. The doctor commander took heroic measures. He bled each sick man, drawing off 100 ounces of blood!

Dover's next prize was the rich ship, Acapulco, from which he obtained loot valued at more than a million pounds sterling. Then he sailed on around the world and returned to Bristol in October, 1711, where he decided to give up piracy and return to his old profession. He became one of the most noted physicians in London and wrote a book which ran into many editions. Incidentally in this book he recommended large doses of quicksilver for every conceivable malady. This book won him the nickname of the "Quicksilver Doctor."

It is doubtful if any other pirate leader has so many claims to fame as this "Quicksilver Doctor" who is remembered because he was a success in two professions, invented Dover's powders, rescued Alexander Selkirk and wrote an extraordinary book, "The Ancient Physician's Legacy to His Country."

RADIO

Five-Tube Tuned Radio Frequency Diagram, Using Square Wound Toroid Coils and Straight Line Frequency Condensers.

By CARLTON E. BUTLER,
Member American Institute of Electrical
Engineers and Institute of Radio
Engineers.

Changing conditions make new radio circuits necessary. A few years ago the single circuit and ultra audio receivers were satisfactory and were capable of bringing in distant stations with volume. Today the same sets cannot be used, except in isolated districts away from broadcasting stations, due to their broad tuning qualities.

The receiver of the earlier day is no longer satisfactory for other reasons, principally on account of its squealing and radiating qualities and because its tone quality is poor and distorted. At the last radio conference in Washington it was agreed that in the near future the use of radiating receivers would have to be ended, even if it became necessary to pass a federal law to accomplish that result.

Today, with modern laboratory standard apparatus available, and with sets of better design, the quality attains the standard demanded by lovers of music.

The R-4 circuit, as developed for use in a new receiving set, is a good example of present day design. The most popular form of circuit was selected—the five tube tuned radio frequency—and by the use of the latest type of condensers, coils, and transformers, together with improvements in the circuit, produced a receiver that is capable of tuning through interference, bringing in stations from a distance on the loud speaker, and surpassing many receivers for all around performance and quality of tone.

To Shut Out Stray Currents. Noteworthy of the improvements in the circuit are two by-pass fixed condensers, between the primary of each of the first two radio frequency transformers and the filament. This serves to by-pass and keep stray radio frequency currents out of the rest of the wiring, and stabilizes the circuit. A large condenser is placed across the "B" battery terminals to reduce noises and howls due to long leads or low voltage.

Refinements in apparatus include the new square wound toroid coil, with the new straight line frequency condensers which provide shielding of electromagnetic lines of force, as well as keep the instrument dustproof, a mighty important detail.

The toroidal coils eliminate the spraying effect of magnetic lines of force within the set proper, and remove the principal bugbear that radio engineers have been working for years to solve. The coils have self-contained fields that make pickup of stray current impossible. Their use in the R-4 receiver makes a set that will tune through strong interference.

The variable condensers on the first and second stages of radio may be tuned by one control as in the manufactured receiver if desired. Three condensers and three dials may be used in the ordinary manner, however, without lessening efficiency.

The Parts Needed. To construct the circuit you will need the following parts:

- 1 Square wound toroid coil, type T1 indicated on diagram as L1.
- 2 Square wound toroid coils, type T2 indicated as L2 and L3.
- 3 Straight-line frequency variable condensers, preferably the All-American shielded type C35, indicated on diagram as C1, C2, and C3.
- 2 Rauland lyric audio transformers, type R500.
- 3 .002 mfd. fixed condensers, indicated on diagram as C4, C5 and C8.
- 1 .00025 mfd. fixed condenser, indicated on diagram as C6.
- 1 1.0 mfd. fixed condenser, indicated on diagram as C7.

The rheostats should each be of six ohms capacity for the use of UV 201-A or C 201-A tubes, and the grid leak R3 should be two megohms. When using the new UX amplifier tubes, break the grid return of the last transformer and insert "C" battery of voltage recommended by the manufacturer.

Raffia Sandals

Raffia sandals, the newest thing for southern wear, show colorful designs embroidered in straw. Others which show the new tendency in footwear are made of linen in a natural color, with designs worked out in mercerized thread of many colors.

Smaller but Higher

The small hats still hold their vogue but the crowns are higher. Crowns come as high as many an American title hunter knows. Felts, reversible

The first rheostat is used as a volume control, to moderate signal strength to the desired extent. For most satisfactory operation, the correct setting of this control may be determined by trial, and then allowed to remain without further adjustment.

In addition to the apparatus named above, you will need five sockets, a 7 by 24-inch panel, baseboard or sub-panel, wire, screws, solder, etc., to complete the set.

The terminals of the radio-frequency transformers are unmarked in the diagram. The first coil is a coupler, with two taps taken off for long and short aerials. Both taps are marked "A" and each should be tried and the aerial connected to the one that gives the best results. The other two taps are the secondary connections and marked in the regular way. The outside terminals of the second and third coils are the primary posts, the inside terminals being the "G" and "F" secondary terminals.

Three-Circuit Is Best Short-Wave Radio Set

An easy short-wave set to build is one on the order of the three-circuit set.

The tuner for this set is made from any good three-circuit tuner about 4 inches in diameter. The secondary consists of ten turns of No. 12 D.C.C. wire, the primary of four turns of the same size wire, the two being medium coupled. The tickler has 20 turns of No. 20 D.C.C. wire.

The secondary is tuned with a .0005 mfd. condenser as shown by the

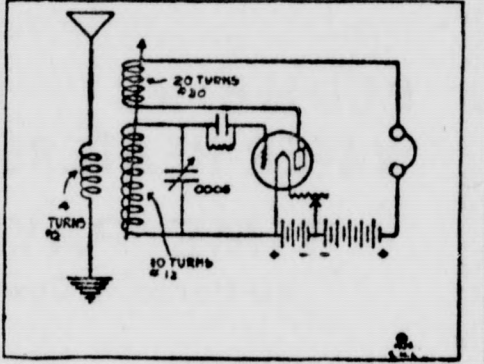

Diagram Showing Circuit of the Short-Wave Set.

sketch. Another important point to note is in winding the tickler. To obtain the best results care should be taken to see that all turns are wound in the same direction and an even number of turns on each side of the shaft.

This set will receive approximately from 2,000 to 10,000 kilocycles, or from 40 to 150 meters. However, every set is different and in order to check your maximum and minimum wave-lengths you should obtain information from the standard frequency station as to when they send test programs, and with these signals you will be able to tell exactly what wave-length your set will cover.

In assembling a short-wave receiver keep in mind the fact that all leads should be just as short as you can make them. If you can get the advice or assistance of one of the many amateurs who have successfully built a short-wave receiver it will be of great assistance.—Philadelphia Record.

To Avoid Body Capacity

A good general rule where the object is to avoid body capacity is to always make that terminal of the instrument to which your hand comes the closest when tuning, at or near ground potential. As most circuits are tuned by a variable condenser across a coil, the rotor plates should be the end connected to the filament circuit. The hand, in effect, comes closest to these plates since the rotor plates connect to the shaft and the shaft carries the dial.

Cut Down Distortion

Cut down distortion by hooking a variable grid leak across the secondary of the second audio-frequency transformer.

NEW BROWN ROOKIE TO ATTRACT FANS

Oscar Mellilo Expected to Lure Two Nations.

Oscar Mellilo, who has a name that takes you back to sunny Italy, if you erase the Oscar, but who hails from Milwaukee, is to be a member of the St. Louis Browns next season. Thereby hangs an interesting tale.

Italian ball players are in the minority; yes, even scarce in the major leagues, but they are on the way. The officials of the Browns are confident the name Mellilo will prove a drawing card.

The Oscar should make a hit with the Germans of St. Louis, while the Italians can enthuse over Mellilo.

There are more native-born Italians in the city of St. Louis than there are of any other foreign nationality except the Germans. The Italians even exceed the Irish when it comes to being "foreigners."

And one has but to visit an Italian section of the Missouri city and crowd his way through the chattering black-eyed youngsters to realize that in the second generation the Italians may be giving even the preponderant German element a race for numbers.

Practically every Italian young man or boy of the second generation—the first of the American born of foreign parents—is a potential baseball fan in St. Louis. The Italian element is a big factor in attendance.

Therein may be one of the reasons that the Browns made a deal that makes Oscar Mellilo a member of George Sisler's crew. The acquisition of Tony Rego might have been an accident; there is more evidence of a design in making Mellilo a Brownie.

Not that the youngster from Milwaukee hasn't claims in his own right; he is said to have been a wonderful fielding second baseman, not much of a hitter, but he can beat down hits—something the Browns' infield hasn't always been good at.

To win a berth with the Browns Mellilo will have to outclass Marty McManus (Irish), Walter Gerber (German) or Gene Robertson (native son). But nationality won't count—the best workman will win.

Charles Hoff Arrives

Charles Hoff, holder of the world's pole-vault record and all-around athlete of Norway, has just arrived in this country for a three-months' visit during which he will compete in many of the leading indoor meets.

Sporting Squibs

Jackson Travis of the Giants is a graduate of Ouachita Baptist college, Arkadelphia, Ark.

Robert Haviland, aged sixteen, is distinguished as the youngest jockey in action on the American turf.

Women tennis players in England are wearing shock socks to add speed to their footwork on the hard courts.

Dempsey, says a biographer, has virtually no sense of humor. On the other hand, who writes his announcements?

Golf will replace gymnasium routine for Babe Ruth. He plans to play 36 holes daily on the warm soil of Florida.

One hundred and sixty-eight games will be played by the American association this year, opening April 13, with the major leagues.

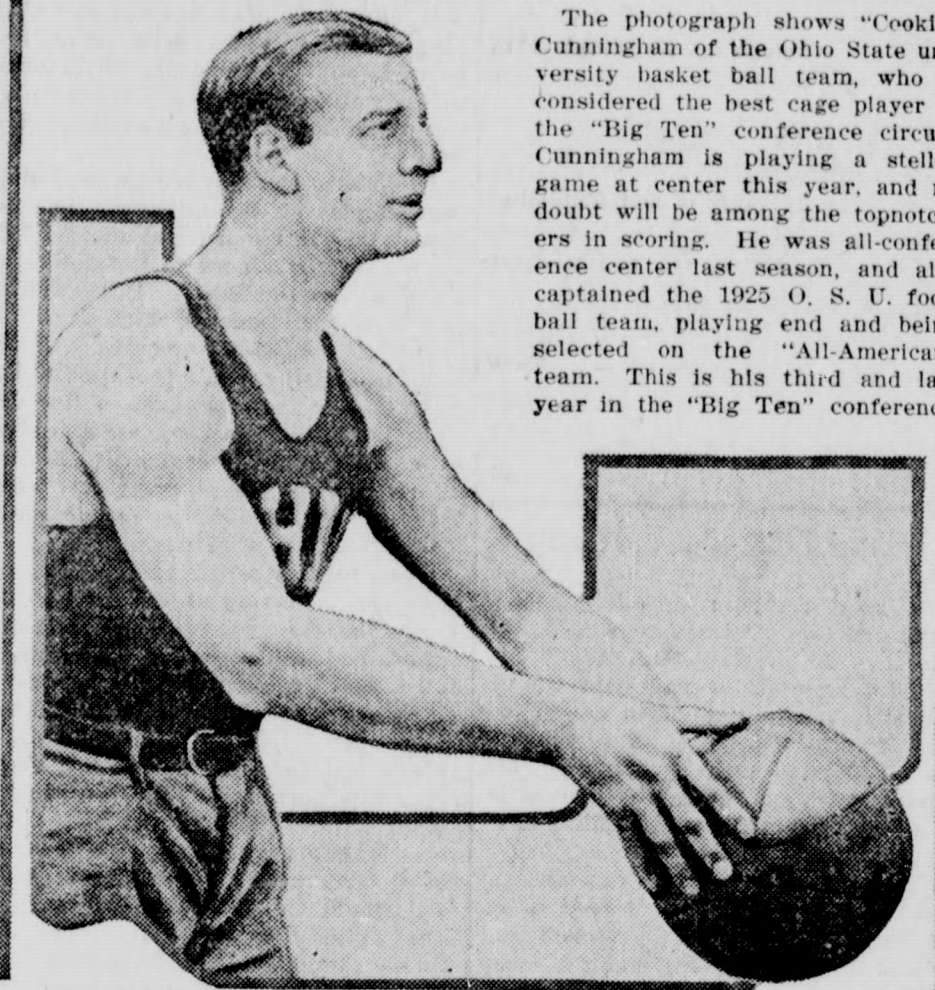

The National A. A. U. boxing championships under the auspices of the Boston A. A. will be held in the Boston arena, April 5 and 6.

Roland R. MacKenzie, Middle Atlantic golf champion and medalist in the 1925 amateur championship, is a student at Brown university.

The 1926 tournament of the Trans-Mississippi Golf association will be held the week of June 21 at the Algonquin club in St. Louis.

Louis Hudson, the star of the University of Toronto hockey team, is the Red Grange of the skating sport among Canadian colleges. He will graduate in June.

Cunningham Is Basket Ball Star

The photograph shows "Cookie" Cunningham of the Ohio State university basketball team, who is considered the best cage player in the "Big Ten" conference circuit. Cunningham is playing a stellar game at center this year, and no doubt will be among the topnotchers in scoring. He was all-conference center last season, and also captained the 1925 O. S. U. football team, playing end and being selected on the "All-American" team. This is his third and last year in the "Big Ten" conference.

Red Sox Catcher Makes Double Play at Plate

One of the unusual plays of the 1925 American league season revealed by "stove league" analysis was that in which Arthur Stokes, catcher for the Red Sox, retired two Detroit men at the plate with one sweep of his arm. He pulled it August 25.

Johnny Bassler was on second and Fred Haney was at first, in the seventh inning, when Rigney hit a long fly to the outfield. Ira Flagstead ran it down, but dropped the ball. Bassler started for home when he saw the ball strike the ground, but Haney, starting at the crack of the bat, was almost at second before Bassler got away.

The two runners were pacing almost as a team when they neared third and going into the plate, Haney slowed up enough to stay only a step behind the slower Bassler.

In the meantime, Flagstead retrieved the ball and threw to Rothrock, at short, the latter relaying the ball to Stokes. The two Tigers, looking over their shoulders, saw the ball coming and hit the dust simultaneously.

Stokes stood his ground and with one sweep of his arm tagged them both before their spikes touched the rubber. Not to be outdone, the umpire shot both arms upward, indicating the double play.

Hardest Fought Race in Years, Says Connie Mack

Connie Mack thinks the American league race in 1926 will be the hardest fought in years; perhaps the toughest in the history of the league. "I don't see any one club that does not have a chance to win out," says the veteran Athletic manager. "I know the Athletics will be a contender, and am not underestimating the Yankees. That club will be back fighting, too."

"Washington is always a hard club to beat. St. Louis, under Sisler, showed what it could do last season. Detroit and the White Sox, under Eddie Collins, will make it interesting. Don't forget, too, that the Red Sox pitchers at the end of last season were going great."

"I really think that there is going to be more competition in the American league than we have had for years. Last season was a two-club race, but it won't be like that this year."

Mack failed to explain the collapse of the Athletics last year. "We just flopped," he said. "It looked as though a pennant just wasn't possible. There was no reason for the collapse as far as I could see, but it happened and before we knew it, we were out of the race."

Rockne Taking Rest

Knute Rockne, athletic director and football coach at Notre Dame, is in Europe taking a much-needed rest. Knute has been actively in the coaching harness for a number of years. Instead of taking a rest during the summer Rockne has conducted schools at various institutions.

German Sprint Star

Hubert Houben, German sprint star who is here to match strides with America's fleetest runners, has been restricted to four appearances in this country by the athletic authorities of his homeland.

Sport Notes

Harvard has more tennis courts than any other two universities in the country.

Brown university will play ten football games next fall, according to the schedule announced.

More than fifty new golf clubs have come into existence in Canada in the last two or three years.

The Futurity at Belmont park in 1928 will have a gross value of \$100,000, the richest stake in the world.

Alf Smith, veteran Canadian hockey star, has been engaged by the New York National league hockey club as a coach.

Princeton professor claims he has discovered the missing link, but denies that it looks like a heavyweight wrestler.

The record for the running broad jump on skates is 25 feet 2 inches, made by Edmund Lamy at Saranac Lake, January 30, 1913.

William M. Heston, Jr., son of Michigan's greatest football player, has been elected captain of the Northwestern high school team.

Connie Mack is banking on Joe Hauser, who broke his knee cap just before the 1925 season opened, to play as well as ever at first next year.

Announcement has been made by the New York Athletic club that its annual indoor track meet will take place in Madison Square garden, February 23.

The latest report regarding a meeting at Juarez, which is over on the hot tamale side of the Rio Grande, opposite El Paso, Texas, is that it will open April 1.

Intercollegiate rowing officials are reported unanimous in the opinion that the four-mile test is the best for the national championship staged annually at Poughkeepsie, N. Y.

Warren Giles, for three years secretary of the St. Joseph club of the Western league, has announced he had been made president of the Syracuse club of the International league, effective March 1.

Dave Altizer, a veteran of the game, who saw service with the Chicago White Sox, Washington and Cincinnati, is said to be in line for an umpirical post in the Three-I league.

Two Letters

The first written twenty years ago, the second recently by Mrs. J. H. Bourland, Frankston, Texas.

June 2, 1904, she writes:—

"For twenty-three years I was a constant sufferer from chronic catarrh. I had a severe misery and burning in the top of my head, a continual dropping of mucus into my throat causing frequent expectoration. My entire system became involved and I grew worse. It seemed as if I could not recover from a constant cough and frequent attacks of bilious colic. My bowels were affected, causing alarming hemorrhages. I tried many remedies and finally took Pe-ru-na. In three days I was relieved of my bowel trouble and entirely cured by five bottles. I most cheerfully recommend Pe-ru-na."

June 30, 1924, Mrs. Bourland writes again:—

"I will soon be seventy-nine years old and enjoy good health for one of my age. I still recommend Pe-ru-na and take it myself when necessary."

For more than half a century Pe-ru-na has a proud record of good deeds. Men and women the world over stand ready to testify to its value in the treatment of all catarrhal disorders.

Send 4 cents postage to the PE-RU-NA COMPANY, Columbus, Ohio, for book on catarrh.

Pe-ru-na in either tablet or liquid form sold everywhere.

HEROES ALL

An almost unprecedented succession of gales which recently swept the northern and western Atlantic developed a new and lengthy list of sailor heroes.

Stories of daring rescues under the most trying conditions have filled the columns of the daily press, demonstrating that the chivalry of the sea still lives with undiminished vigor in the breasts of present-day seamen.

A total of twenty-seven lives were lost when more than a score of vessels, some of large size, were sunk or disabled and tossed helplessly at the mercy of the waves for days on end, while other staunch craft battled to tow them to port or rescue their crews, as circumstances required.

Outstanding among these deeds of supreme heroism was the rescue of the crew of the British freighter Antinone by the United States liner President Roosevelt, after lifeboats had been repeatedly smashed and two lives lost. The last of the crew of twenty-five men were finally brought to safety in the sixth lifeboat launched from the Roosevelt.

Throughout all the trying ordeals which beset these men of the sea, not a single instance of flinching from stern duty was recorded, while examples of superb courage were everywhere in evidence. Living or dead, they have proved themselves heroes all.

Anyway, the habit of drinking boot-leg liquor only lasts a few years.

PLIGHT OF COAST GUARD

It was a rather appealing story that was told recently regarding the plight of his men by Lieutenant Commander Yeandle of the Coast Guard. While it was not intended as an excuse for the actions of those guardsmen who have been convicted of conning with rum runners, it may be considered by some as affording mitigating circumstances.

Lieutenant Commander Yeandle said that the guardsmen are forced to go to sea in 75-foot boats, pitched and tossed by the waves, making sleep difficult and the serving of hot meals almost impossible. Night after night they keep their vigils, stung by chilling winds and spray, suffering untold discomforts and hardships.

Then, upon return to shore for a brief rest, they are greeted with insults and epithets such as "booze gobs" and "rum navy men," by people on shore who are not in sympathy with enforcement. He also asserted that families of guardsmen are insulted and ostracized by their neighbors.

In face of these hardships and indignities, suffered for the sake of earning the small government wage they receive, it was declared to be not surprising that some should be tempted by the rum runners' gold.

Of course, the hardships of the guardsmen do not excuse disloyalty to duty. But, with conditions as described by Lieutenant Commander Yeandle, it is going to be extremely difficult to maintain the morale of this oldest branch of our military service, whose brilliant record in the past has filled many glorious pages.

SHIRT PULLING

For 10,000 years man struggled thru the ordeal of pulling his shirt over his head. Donche remember how we used to struggle an' cuss an' get red in the face? It was worse than any Daily Dozen ever invented.

Then about 10 years ago some bright genius got the idea of splitting his shirt open all the way down the front and oozing gently into it like a coat.

The wise old birds of the chin whiskers type shook their heads and said "Nobody would wear 'em."

If I walked into a store to buy a shirt at the present time, and they showed me a "Pull It Over Your Head Kind," I'd—Well, you know what I'd do.

Now all this has nothing to do with movies. But take my tip and if you missed seeing D. W. Griffith's "The Love Flower," be at the Daly Theatre this Sunday to see this great masterpiece. If you have seen it, you will enjoy it again.

L. M. REESE.

MAKE THE CARELESS PAY

It has often been pointed out that the surest way to better the fire hazard condition in a city is to touch the sensitive pocketbook of the person responsible for maintaining the hazard.

In automobile, transportation, building, employment, and every line of industrial and commercial activity, we in this nation adhere to the policy of personal responsibility. But when it comes to carelessness with fires we have let the guilty parties go the limit in causing the city expense for maintaining and operating a fire department, or for causing his neighbor expense through necessarily higher insurance rates and property destroyed through fires caused by carelessness or deliberate recklessness.

The insurance commissioner of Michigan is setting an example which should be followed. A local citizen maintained a dangerous fire hazard and refused to clean up his premises, which endangered his neighbor and the whole city. After a fair warning a substantial increase in his insurance rates was permitted. If the commissioner follows the policy of increasing rates where unnecessary fire hazards are not corrected, he will get results and benefit the whole nation through other states following suit.

This should be one of the functions of a state insurance department, for it can do what individual companies have no power to do in a matter such as this.

WHO GETS TAX REDUCTION?

The bills that are being put through congress to lop of millions of federal taxes will benefit the great mass of the taxpayers, including the large taxpayer, the small taxpayer and the non-taxpayer.

Tax reduction is inevitably a great stimulant to industry, to investment and to the inauguration of new enterprises, because it means a lowering of production cost.

Now it is a fact that cost of production is almost inevitably passed on to the consumer, as much as raw materials and labor costs, only the item of taxation is a permanent one liable to be increased by state and local authorities.

It is not easily controverted that the sale price of an article, which must be the total cost of production plus a profit, and all cost of operation, is finally taxed upon the consumer. And so it comes about that all are benefited by tax reduction.

STOP RECKLESS DRIVING

Motor accidents and compulsory automobile liability insurance "as an evil that must be remedied," were discussed by Edward C. Stone, associate United States manager of the Employers Liability Company.

He noted the rather curious fact that those chiefly in favor of compulsory liability are not so much interested in reducing and preventing accidents as in securing some way to assure pecuniary damages to those injured by automobiles—in other words, they would guarantee solvency of all defendants.

Mr. Stone favors action to stop irresponsible reckless drivers from operating automobiles—which would remove the chief reason for compulsory automobile liability insurance. Is this not more fair than taxing all drivers for the damages resulting from the recklessness and carelessness of a small percentage?

DON'T KILL THE BIRDS

The Department of Agriculture estimates give seventy-five billion as the probable number of birds in the world, about forty times the number of people. They estimate five billion birds in the United States alone.

Birds are mankind's best friends. Practically every bird is a costless, automatic, self-perpetuating bug and worm killer, without whose aid the country would soon swarm with insect plagues like those of Egypt in the times of Pharaoh.

It is perhaps good business for the nation that gun and ammunition prices are so high that comparatively few people can buy them for bird killing. There was a time when the household shotgun was desirable, even necessary, to fill the family larder. Now the kitchen table is supplied best by the absence of means to kill the birds and save the crops.

A GOOD CITIZEN

"The obligations of citizenship do not rest solely or chiefly in the exercise of the privileges of voting, or in conducting campaigns, or in the holding of offices. Important as are all these duties their performance will amount to nothing unless our citizens are imbued with the spirit of our institutions, which means respect for a government of law, a sincere desire to better in every practical way the conditions of human life, loyalty in all relations of life, and the disposition to be kindly and fair in all dealings with one's fellow men."—Charles E. Hughes.

The course of true love never runs smooth. The truth of this old maxim was discovered by Hoot Gibson in "Taming the West," a Universal-Gibson comedy coming to the Daly Theatre tomorrow (Saturday.) Gibson, as a city youth, goes into the West and falls in love with a rancher's daughter. Her father discovers that the boy is the son of his mortal enemy and forbids him to see the girl again.

But he does, and the subsequent happenings make the picture replete with thrills.

The navy wants a dirigible three times as large as the Shenandoah, which would almost eclipse some of the gasbags in congress.

Minnesota officials are having some trouble in getting hunters to report game killed, but fishermen usually admit the size of their catch.

COMMISSIONER'S NOTICE OF SALE

In the Superior Court of the County of San Mateo, State of California.

Alfonso Pavia, Plaintiff, vs. Peter Magnone and Irene Magnone, his wife, Defendants.

Under and by virtue of an order of sale and decree of foreclosure issued out of the Superior Court of the County of San Mateo, State of California, on the 12th day of January, 1926, in the above-entitled action, in said Superior Court, wherein the above-named plaintiff obtained a judgment and decree of foreclosure against the said defendants on the 12th day of August, 1925, which said judgment and decree was on the 21st day of August, 1925, recorded in Judgment Book 16 of said Court, at page 393, to which judgment and decree reference is hereby made for the terms, conditions, and manner of sale, and the amount due, I am commanded to sell all that certain lot, piece, or parcel of land, situate, lying and being in the said County of San Mateo, State of California, and bounded and described as follows:

Lot 28 in Block "A" as designated on the map entitled "Map of the Mission Street Tract in San Mateo County, Cal." which map was filed in the office of the Recorder of the County of San Mateo, State of California, on January 21, 1907, in Volume "D" of Maps at page 50, and a copy thereof entered in Volume 4 of Maps at page 51, described as:

Beginning at a point on the south line of Los Angeles Avenue, distant along said Avenue Seven Hundred Twenty-three (723) feet westerly from the west line of Mission Street, as said Avenue and Street are shown on the map above referred to, and said point of beginning being at the division between lots 27 and 28; thence from said point of beginning westerly along Los Angeles Avenue Twenty-five (25) feet to the division between lots 28 and 29; thence at a right angle southerly along said division One Hundred (100) feet to the south line of lot 28; thence at a right angle easterly along said south line, parallel with Los Angeles Avenue, Twenty-five (25) feet to the division between lots 27 and 28; thence at a right angle northerly along said division One Hundred (100) feet to the point of beginning.

Together with all and singular the tenements and hereditaments and appurtenances thereunto belonging, or in anywise appertaining, and the rent, issues and profits thereof.

And public notice is hereby given that on Tuesday, the 23rd day of February, 1926, at 10 o'clock A. M. of that day, at the front door of the Court House in the Town of Redwood City, County of San Mateo, State of California, I will, in obedience to said order of sale and decree of foreclosure, sell the above described property, or so much thereof as may be necessary to raise sufficient money to satisfy said judgment, with interest and costs, to the highest and best bidder, for cash in lawful money of the United States.

Dated this 26th day of January, 1926.
 T. C. MCGOVERN,
 Commissioner appointed by said Court.
 George T. Kerr, Attorney for Plaintiff.
 Published in the Daly City Record four times.

SUMMONS

No. 11533.

In the Superior Court of the State of California, in and for the County of San Mateo.

Antonio Norcia, Plaintiff, vs. All Persons Claiming any Interest in, or Lien Upon the Real Property Herein Described or any part thereof, Defendants.

Kirkbride & Gordon, San Mateo, California, Attorneys for Plaintiff.

The People of the State of California send greeting to all persons claiming any interest in, or lien upon, the real property herein described or any part thereof, as follows, to-wit:

You are hereby required to appear and answer the complaint of Antonio Norcia, plaintiff, filed with the Clerk of the above entitled Court and County, within three months after the first publication of this Summons, and to set forth what interest or lien, if any, you have in or upon that certain real property, or any part thereof, situate in the City of Daly City, County of San Mateo, State of California, and particularly described as follows, to-wit:

Lots Thirteen (13) and Fourteen (14) in Block Four (4) as designated upon the map entitled "Map No. 1 Vista Grande San Mateo Co. Cal." which map was filed in the office of the Recorder of the County of San Mateo, State of California, on November 5, 1906, in Volume "C" of Maps at page 35, and a copy thereof entered in Volume 4 of Maps at page 41.

And you are hereby notified that unless you so appear and answer the plaintiff will apply to the Court for the relief demanded in the complaint, to-wit: That this Court by its judgment and decree ascertain and determine all estates, rights, titles, interest and claims in and to said real property and every part thereof, whether the same be legal or equitable, present or future, vested or contingent, or whether the same consists of mortgages or liens of any description; that it be adjudged and decreed that the claims of any person claiming an interest in, or lien upon, the real property herein described or any part thereof, is without merit, and that they have no claim, right, title, estate or interest whatsoever in and to said real property or any part thereof; that this Court adjudge and decree this plaintiff to be the owner in fee simple absolute of said real property and every part thereof, and to be in the actual and peaceable possession of said property and every part thereof, and establish plaintiff's title thereto against all persons whatsoever; and for such other relief as may be met, and for plaintiff's costs herein.

Witness my hand and seal of said Court this 14th day of December, 1925.
 ELIZABETH M. KNEESE,
 Clerk.

A. M. Bullivant, Deputy Clerk.
 MEMORANDUM: The first publication of this Summons was made in the Daly City Record newspaper on the 15th day of December, 1925.

The following persons are said to claim an interest in, or lien upon said real property adversely to Plaintiff:

Toni Scrima, deceased.

Antonietta Scrima, also known as Antonietta Salazzo, deceased.

Tony Salazzo, deceased.

Joseph Salazzo, also known as Joseph Scrima, a minor, 812 Doolittle Avenue, Carnegie, Allegheny County, Pennsylvania.

Raffa Sasso, wife of Vincent Sasso, 701 Eason Street, Bridgefield, Allegheny County, Pennsylvania.

Joseline Sasso, wife of Mike Sasso, Carnegie, Allegheny County, Pennsylvania.

Filomena Salgato, wife of Toni Salgato, Greer, Italy.

Pennsylvania Trust Company of Pittsburgh, a corporation, 5th Avenue at William Penn Way, Pittsburgh, Pennsylvania, executor of the last will and testament of Tony Salazzo, deceased.

The Pittsburgh Trust Company, a corporation guardian of the estate of Joseph Salazzo, also known as Joseph Scrima, a minor, Fourth Avenue, Pittsburgh, Allegheny County, Pennsylvania.

State of California.

Frank C. Jordan as Secretary of the State of California, Sacramento, California.

Ray L. Riley as Controller of the State of California, Sacramento, California.

Franklin Svarz as District Attorney of the County of San Mateo, State of California, Redwood City, California.

Colma News Notes

By SYLVIA HAUBRICH FISCHER

Mr. Ailers is said to be quite ill at his home here.

Henry Bauer returned to Colma last week after spending two weeks with relatives here.

Mrs. Robert Silva, of San Francisco, visited Mrs. B. W. Haubrich, of Mission street, last Monday.

Mrs. Beatrice Batz is ill at a San Francisco hospital. Her many friends hope for her speedy recovery.

Mrs. Ramirez and Miss Alma Ramirez spent one day of last week at the Maderas home in San Francisco.

An enjoyable whist party was given by Cypress Circle, Ancient Order of Druids, in Jefferson Hall, San Pedro avenue, last Tuesday evening.

Miss Eva Homier and a party of friends will leave Saturday evening to spend the week end at Truckee, where they will attend the snow carnival.

A meeting of the drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will be held in the Daly City Auditorium on Friday evening.

A meeting of El Carmelo Parlor No. 181, Native Daughters of the Golden West, was held in Masonic Hall, Daly City, last Wednesday evening, President Margaret MacDonald presiding.

J. T. Casey, realtor of Colma and Daly City, announces that he has recently received a number of inquiries for acreage in the vicinity of Colma, and hopes to be able to supply all demands in the near future.

Mrs. Irene Doyle, of South San Francisco, was in town Monday last.

Mr. and Mrs. E. Maffei, of Lomita Park, visited at the Haubrich home last Sunday afternoon.

Miss Margie O'Connor has recovered from her illness and has resumed her work in San Francisco.

Mrs. Rose Biggio, who was ill at a San Francisco hospital for the past week, is said to be improving.

A wonderful jazz orchestra, the personnel consisting of girl players, was heard at the New Colma Theatre this week and very much enjoyed by all.

Don't forget the Girls' Club whist party which will be held on Saturday evening, February 20, in the Community Center building on Dunk street.

The Colombo Society will give a dance in their auditorium on San Pedro avenue on Sunday evening, February 21. Dell's accordion orchestra will provide the dance music.

The members of the Santana and Santangelo Clubs of Holy Angels' church are busy practicing for a new play which will be presented in the New Colma Theatre on Monday evening, March 15.

An automobile was struck by an interurban car, just below Colma, on Thursday afternoon, the car being considerably damaged. This shows more than ever the need for breaking the "bottle neck" of the highway.

Mr. Mitchell, of San Francisco, father of Mrs. William Mowry, passed away in San Francisco last Friday and was buried Tuesday of this week. Mrs. Mowry's many local friends extend their sympathy in her bereavement.

The auditorium of Jefferson Union high school will be transformed into a Colonial ballroom on Friday evening of this week, when a Colonial dance will be given by the student body of the high school. The affair is invitational and all are to wear suitable costumes.

One of the most successful affairs ever held in the Jefferson Union high school was the minstrel show which was presented by the pupils last Friday evening. The auditorium was crowded to capacity, and the program was brimfull of pep and jazz. Every number received great applause.

The following members of the drill team of El Carmelo Parlor No. 181, Native Daughters of the Golden West, will leave Saturday morning for Truckee and Donner Lake: Lorraine Wall, Tessie O'Connor, Grace Johnston, Elsie Fahey, Margaret Varni and Sylvia Fischer. They will attend the snow carnival, returning home Tuesday.

A good time is awaiting all at the whist party and dance to be given by the Girls' Club of Colma on Saturday evening, February 20, at the Colma Community Center library building. Refreshments will be served after the whist, while the remainder of the evening will be spent in dancing to Julius Schindler's orchestra. Don't miss this affair.

Last Wednesday afternoon Mrs. Robert Heeringa tendered her sister, Mrs. Edward Bauer, a surprise birthday party at her home on Price street. A delicious spread was served, the table being decorated in pink and

white with spring flowers as a centerpiece. Mrs. Bauer was the recipient of many beautiful gifts. The following enjoyed the afternoon: Mrs. Edward Bauer, Mrs. B. W. Haubrich, Mrs. Lena Homier, Mrs. Minnie Gibbons, Mrs. Earle Jones, Mrs. Stephen Fischer, Mr. and Mrs. Howard McMullin, Mr. and Mrs. T. Crummis, Mr. and Mrs. Carl Schwarz, Mr. and Mrs. Ellis C. Johnson, Mr. and Mrs. Robert Heeringa, Misses Lena Jost and Emily Bauer and Howard McMullin, Jr.

On Monday evening the great indoor festival sponsored by the Colma-Visa Grande Aerie No. 1848, Fraternal Order of Eagles, came to a close in the Daly City Auditorium, after four evenings of enjoyment. There were vaudeville numbers and many novelties, besides dandy orchestras to furnish dance music on these evenings. Great was the excitement on Monday evening when at 11 o'clock the winner of the popularity contest was announced to be Miss Thelma Selmi, the candidate of El Carmelo drill team. The cheers could be heard for many minutes after the announcement. Miss Selmi, and Miss Martini, who was second in the race, each thanked their supporters in a graceful manner. El Carmelo Parlor No. 181, Native Daughters of the Golden West, is proud of its winner, Miss Thelma Selmi.

LECTURES SCHEDULED AT HOLY ANGELS' CHURCH

The Rev. P. J. Diamond of the Salesian order will preach a course of Lenten lectures on the Wednesday evenings of Lent, at the Church of the Holy Angels, Colma. Services will begin at 7:30. The pastor, the Rev. C. J. Bertola, hopes his parishioners will avail themselves of this opportunity to sanctify the Holy Season and receive the blessings that Easter will bring them.

The following are the arguments to be treated:

Wednesday, February 24—"Insurance Before, Not When the Fire Starts."

Wednesday, March 3—"Furniture, House, Liabilities. Are You Protected? Insure."

Wednesday, March 10—"Property Values Have Increased. Have You Increased Your Insurance?"

Wednesday, March 17—"Insurance Service: Best Companies, Maximum Service, Minimum Cost."

Wednesday, March 24—"Good Buys in Real Estate. Easy Terms."

Wednesday, March 31—"Be Thrifty. Buy Your Own Home."

Friday, April 2—"Real Estate Purchased and Insured."

HOLY ANGELS' CHURCH, COLMA

On the first Sunday of Lent, February 21, at 4 p. m., the Most Reverend Archbishop Edward J. Hanna will confer the Holy Sacrament of Confirmation at the church of the Holy Angels, Colma.

MINING NATIONS STRONG

In 1915 the gold mines of the United States produced \$101,035,700; in 1925 they produced but \$49,126,900, or only 48.6 per cent of the high record.

It is true that there is gold in the federal treasury, and that some gold is now going into daily circulation after it had been practically forgotten as a medium of daily exchange; but there is a wide and splendid field for gold mining. Gold is a national necessity.

A metal mine in a state is a splendid asset. It brings highly paid labor, a steady buying market, and clean profits. Metal mining has an indefinable connection with the national fibre. Nations with metal mines that have developed themselves are the strong, virile nations of all history. It's worth while to encourage mining.

There was an average of about 67,700,000 telephone calls a day in the United States in 1925.

Some do their most convincing lying just after swearing to testify to the truth.

NOTICE OF FILING OF LIST OF ASSESSMENTS UNPAID

NOTICE IS HEREBY GIVEN that on the fourth (4th) day of February, 1926, GEORGE A. KNESE, Superintendent of Streets of the City of Daly City, filed with me, the City Clerk and ex-officio Clerk of the Board of Trustees of said City of Daly City, a complete list of assessments unpaid under that certain assessment, diagram and warrant issued the 23rd day of March, 1925, to Chambers & De Golyer, said assessment, diagram and warrant being for the work and improvement contracted for, and the contract therefor completed and fulfilled, under and pursuant to the provisions of the "Improvement Act of 1911," as amended, and the provisions of the "Improvement Bond Act of 1915," as amended, and also under and pursuant to Resolution of Intention No. 27, passed and adopted by the Board of Trustees of said City of Daly City on the 14th day of October, 1924, and other resolutions, notices and proceedings duly adopted and taken thereunder, reference to said Resolution of Intention being hereby expressly made for a description of the work.

NOTICE IS HEREBY FURTHER GIVEN that interested persons may appear before the Board of Trustees of said City at the regular meeting of said Board of Trustees to be held on March 8, 1926, at the hour of 8:00 P. M. of said day, at the regular meeting place of said Board, and show cause why bonds should not be issued upon the security of the unpaid assessments as shown on said list, that being the time hereby fixed by me for such purpose.

Dated this 10th day of February, 1926.
B. C. ROSS,
City Clerk and ex-officio Clerk of the Board of Trustees of the City of Daly City.

STORE'S TELEPHONE SALES ESTABLISH FINE RECORD

The extent to which a telephone sales plan may be developed in the modern department store is shown by the success of a Canadian store that employed a sales force of over 120 persons just to take care of telephone orders.

In 1923 the general merchandising department handled 699,840 telephone orders totaling \$870,583. The grocery and meat and fish department handled 1,301,534 telephone orders totaling \$1,165,821. These telephone orders averaged a fraction more than \$1. The figures for 1924 showed an increase of 10 per cent in the volume of orders handled, and a 12.5 per cent increase in the amount per order. Figures for 1925 are now being analyzed and are expected to show an even greater gain.

DON'T BE A MISER

The Treasury Department estimates that there are 8,000 misers in America, who keep their hoardings merely to gloat over them. The estimate is that \$400,000,000 in cash is hidden away in mattresses, holes in the wall, in socks, in various clever or foolish places, instead of being deposited in safe banks. Money hidden away and not used is essentially dead. Much of it is destroyed in fires, by rats, by the death and forgetfulness of the holders. It's an utterly foolish thing to do—to slave away to earn money, putting one's life-blood into it, and then lay it away to mould or be stolen or lost. The only money worth having is the money at work.

When a movie couple publicly announce that they are perfectly happy the divorce lawyers feel the same way.

THE ELECTRIC AGE

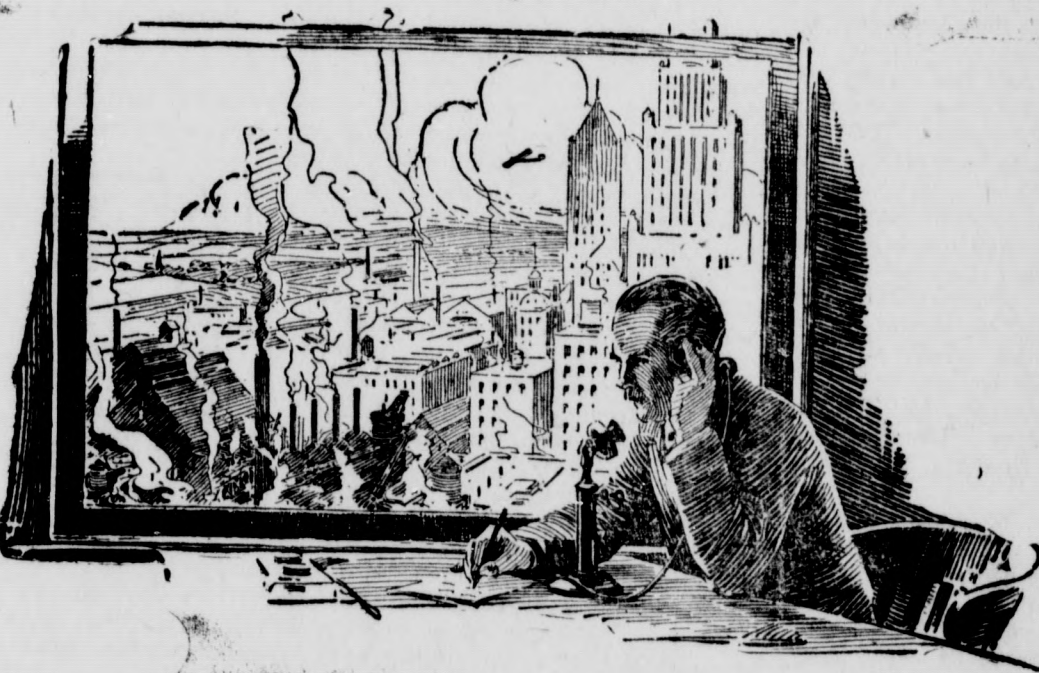

An alarmist newspaper sees a great menace to the American people from what it calls a gigantic superpower electric combination in the United States.

This being an age of electricity, the superpower menace can be juggled to alarm the public not yet familiar with the advantages of handling electricity in large units.

When the handling of electricity in gigantic units is found to be the means of supplying cheaper light and power to every home, the political scarecrow of superpower will disappear.

Some free verse we've tried to read is dear at that.

Prisoners enjoy music and always listen eagerly for the opening bars.

An Agent of Activity

IN the one hundred and fifty years that have passed since the birth of the nation, the area of the United States has grown from the narrow strip of territory along the Atlantic seaboard to a domain of 3,000,000 square miles.

There is nothing comparable in the world to the varied and continuous activity in this vast area. The United States leads every nation in the world in industry, agriculture, and commerce,—in the output of its

mines, the products of its forests, the crops of its soil, the goods of its factories, the volume of its trade.

It also leads in communications agencies for the rapid and dependable interchange of thought. Two-thirds of the world's telephones are today in the country's homes, offices, and factories. Fifty million times daily the wires that interconnect them are used for the transaction of the nation's business.

The AMERICAN LEGION

For This Department Supplied by the American Legion News Service.)

NEW SECRETARY OF LEGION AUXILIARY

Mrs. Lucy P. Boyd of Indianapolis has been appointed as national secretary of the American Legion auxiliary.

Mrs. Eliza London Shepard, national president, Mrs. Boyd, who has been connected with the Legion and the auxiliary since 1919, succeeds Miss Wetherholt of Gallipolis, Ohio, who resigned to resume work in the business world.

Mrs. Boyd began her work with the Legion when offices of the national organization were first established in Indianapolis in 1919. Upon the formation of the auxiliary in 1921, she at once became affiliated with it. She began work at the national headquarters of the auxiliary. She was chief administration and later assistant national secretary for three years.

During the World War Mrs. Boyd was the bureau of war risk insurance in Washington. Her eligibility as a member of the auxiliary is through her husband's military service. Her appointment to the national secretaryship is a promotion in recognition of her faithful and efficient service at auxiliary headquarters.

Miss Wetherholt was president of Lafayette unit of the auxiliary at Gallipolis, one of the first units organized in Ohio. In 1921 she was elected department secretary. The year following she was appointed national secretary by the late Dr. Kate Waller Barrett, then national president of the organization.

Patriot's Flag Creed Idea of Easy Contest

The subject of the American Legion's national essay contest for school children for the year 1926 was chosen with the view of securing a flag creed for the nation. The subject of the contest is "A Patriot's Flag Creed."

Frank C. Cross, national director of the Americanism commission, in announcing the subject said:

"The National Americanism commission of the Legion desires to secure a patriot's flag creed, not more than 125 words in length, which will foster greater respect for the flag of the United States. The flag creed must display originality; it must be inspirational."

Prizes of \$750, \$500 and \$250 for first, second and third place winners, respectively, have been offered. These cash prizes shall be used only for scholarships in colleges or universities to be designated by the winners. Prizes of a silver medal, a bronze medal and a certificate of merit will be awarded for the winner of first, second and third place, respectively, in the state competition.

No person may compete who is less than twelve nor more than nineteen years of age, and only one manuscript may be submitted by each. The flag creed must not exceed 125 words. All entries must be in the possession of the national director of Americanism of the Legion by noon, March 16, 1926, and all competitors must pledge that the essay they submit is their own.

Chip Off the Old Block

"Spike, dear," said the burglar's wife, "I want you to punish Junior. I entertained the Ladies' Shopping society this afternoon, and he and that McGarry boy stole all the ice cream and cake I had for refreshments."

"At's too bad, babe," sympathized her husband. "Youse oughta had 'em locked up."

"They were," was the tearful response, "but what good did it do me with the house full of old burglar tools?"—American Legion Weekly.

A Tough Break

It was after the tornado. "So when you came back from your visit," said a reporter to a man whose residence had been carried away, "you found your house totally demolished." "Yes," answered the latter, "an, do you know, I had a sort of a feeling all along that we should of stayed

WARNS POLICE WHEN DRIVER IS SPEEDING

Lieut. Martin Noonan of the bureau of public safety, police department, demonstrating the citizens' protective speed control. This device is connected with car gears. When going at city limit speed a green light is lit. When car moves faster, a red light appears and a horn connected blows continuously. Flag shown in photograph denotes that the car is traveling at city limit speed; when turned vertical the car is traveling beyond that speed.

IMAGINATION IS AID TO DRIVER

All Sorts of Dangers Flash Before Him Which He Carefully Avoids.

"The man with imagination will have fewer accidents than the man without this quality," says Charles M. Hayes, president of the Chicago Motor club. "The motorist who can put himself in the place of the other driver will anticipate much trouble. The man with imagination will realize that the child at play on the sidewalk may suddenly decide to chase a ball out on to the street. He imagines all the possible dangerous situations that may arise. On a hill he knows that another car may be concealed over the crown, and consequently he does not attempt to pass cars going in the same direction. He knows that a fast-traveling car may be hidden from view behind some curve on a lonely country highway. His imagination builds rather pessimistic opinions of the ability of other drivers and of pedestrians, but this attitude is a safe one, if not a complimentary one to the rest of mankind."

Demands Wide Margin of Safety.

"The pessimistic attitude makes for an awareness in driving that countenances no lapse into automatic driving. The car is guided automatically, but the driver does not allow his subconscious mind to rule the wheel. He is aware of all that happens. He is prepared for unusual conditions and his pessimistic attitude makes him demand a wide margin of safety. The reverse of this attitude is seen in the actions of the optimistic driver who never has had an accident, and who thinks that if accidents are to happen they will come to the other fellow. This driver takes no account of unusual conditions. A rainy or snowy night will find him driving as fast as he would drive on a pleasant afternoon with vision unobstructed and the streets dry. The imaginative driver does not depend upon his horn. He knows that his brakes are more effective. He slows down when he sees a group of pedestrians, and he gives them the horn when he is several hundred feet away from them, which gives them sufficient time to act. But he slows down and if they do the unexpected he is prepared."

Education Is Needed.

"Laws and regulations will not instill this habit of caution into the minds of the motorists. Examinations will not weed out those lacking in imagination. If a man thinks that he is a specially favored darling of fortune no help is in store for him unless he deliberately changes his mental attitude. This changed attitude can be accomplished only by education."

Simple Little Trick to Make Rim Fit on Wheel

When a rim with tire is mounted on the wheel, it often happens that the rim cannot be moved into place, remaining partly on and partly off. Slight springing of the rim is all that is needed and this may be done by placing the head of a jack against the hub of the wheel, and the base of the jack on the protruding portion of the rim. Thus sprung a little, a hammer blow will slide the rim over the edge of the wheel. In most cases of this kind, the mere operation of the jack will force the rim over the wheel.

Tip Offered on Driving to Lower Repair Bills

When a car that is rolling along at a speed of 25 miles an hour strikes a stone or a bad bump, every vital and moving part of the motor and mechanism receives the impact of a blow of nine or ten tons in force. Not fully realizing this, many drivers continue day after day to drive merrily along, subjecting their cars to untold punishment when by simply avoiding the bad spots much trouble might be saved. If more care were taken in motor car driving cars would stand up longer and

Underinflation Blamed for Much Tire Trouble

Seventy-five per cent of the motorists' tire trouble, it is estimated, is due either directly or indirectly, to underinflation. When it comes to underinflation, don't guess. Use a gauge. It is only a matter of a moment's work, but it means dollars saved in tires.

When not properly inflated tires readily rim out. Particularly is this true over rough places, where the rim chafes and bruises the fabric. Underinflation also means an unequal tension in the fabric plies making up the carcass, which results in chafing, fabric separation and ultimately in a blow-out.

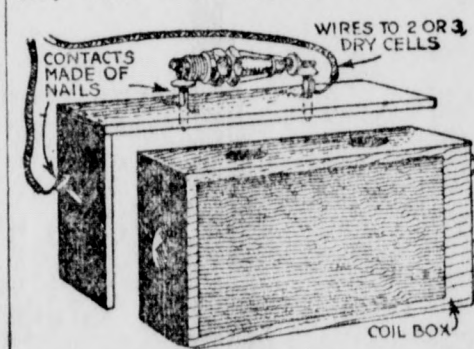

While it is quite true that an under-inflated tire is more elastic and more resilient, the motorist pays dearly for this. Loaded, the underinflated tire, by reason of increased hinging action near the rim and at a sharp angle, is often more or less devulcanized or softened by the resultant heat.

It pays big dividends, in freedom from tire trouble, to rigidly observe the inflation pressure recommended by the manufacturer. It is so simple a matter, requiring only a moment, but the motorist has no one but himself to blame when he neglects to test his tire pressure with a gauge.

If the motorist wishes to obtain the maximum mileage built into a tire he should pay heed to this timely warning against underinflation, according to tire men. Inflation is the first cardinal principle of tire conservation. If you do not have a tire gauge, purchase one today. Even after trouble has begun prompt action in taking an injured casing to a tire surgeon for repair or the use of a tire gauge will greatly prolong the life of the casing.

Good Strong Spark Very Necessary in Winter

In cold weather a good strong spark is necessary. To insure having one, the tester illustrated is valuable. Use it either with dry cells or storage battery while adjusting the vibrator to

Simple Testing Board for Auto Coil and Spark Plugs.

give a high-pitched buzz and regulate the spark-plug gaps until the strongest possible spark is given. I find this apparatus of help in winter and summer.—Clyde E. Volkers, in Popular Science Monthly.

False Economy to Save Moment by Fast Driving

It is false economy to try to save a moment by reckless speeding. The attempt may result in a smash which will lay the driver up for several months and the car for several days. If death itself is not the price. Reckless driving is not a demonstration of skill, but an illusion of foolishness.

Hurrying to get ahead of a train, a street car or another vehicle saves only a moment or two at the ultimate destination and the gain is not worth the grave danger of paying the price of a serious and perhaps fatal accident.

There are certain safety rules of the road which the careful driver observes and these precautions should always be carried out. Slow up for all turns in the road. Blind corners are dangerous. When it is impossible to see what is coming around the corner it is well to be prepared to stop.

Easy Backing

Some drivers never do learn how to back into a small space. If the driver who has trouble in parking will set his front wheels perfectly straight, and then cut a notch in the steering wheel directly in front of the driver's position, he will ever afterward be able to back in without

Daddy's Evening Fairy Tale

By Mary Graham Bonner

PROUD MR. PEACOCK

"I'm fine, I'm fine," said Mr. Peacock. "So am I, so am I," answered Mrs. Peacock. And their voices sounded very shrill.

"Of course you're not fine the way I am," said Mr. Peacock.

"Oh no," said Mrs. Peacock. "Still, I'll do, I'll do."

"Probably," said Mr. Peacock.

"Certainly," said Mrs. Peacock.

"You'll do as you are for what you are, but you wouldn't do for a peacock."

"A Mr. Peacock has to be very much more handsome than a Mrs. Peacock."

"True," said Mrs. Peacock. "I don't object."

"I think that is a stupid story," said Mr. Peacock, after a few minutes in which he had been thinking quite hard for him.

"I'm sure I don't know which story you're talking about," said Mrs. Peacock.

"You will have to be a little more clear, if you wish me to understand you."

"I mean," said Mr. Peacock, "that story about our feet."

"You remember that the old saying

"Oh, See Your Feet, Peacock."

is that we drop our beautiful feathers if any one speaks of our feet."

"Now it is true, our feet are very ugly."

"It is said that we can't be beautiful in all parts."

"Then don't let's talk of anything except our beauty," said Mrs. Peacock.

"Ah, but I must speak of our feet, for this reason," continued Mr. Peacock.

"It is too bad we can't have beautiful feet, but still feet are of little importance except to walk upon."

"That is what I consider to be the case when I am thinking about feet."

"Perhaps I would feel different about feet, and like them better, and admire them more, if I had beautiful ones."

"However, our wonderful trains, the marvelous trains of the Mr. Peacocks, our glorious feathers, they are enough for which to be proud."

"Well, a child came along the other day, and she called out to me when I was standing with my train spread out, looking my very best."

"Oh see your feet, Peacock."

"Of course she thought my train would drop and that I would hang my head in shame."

"But I didn't. No, I didn't!"

"Other peacocks may have done that, but I didn't."

"I stood just the same way."

"And the little girl was quite disappointed. Then she told her companion the story so that I heard it, though I had heard it before, about peacocks always dropping their trains when their feet were mentioned."

"I consider it a stupid story."

"I have shown two little girls that there existed a peacock, a handsome peacock, who proudly walked around, that I didn't think it worth while to notice my feet. I showed them that I was satisfied with my beautiful plumage."

"Others may have happened to drop their trains when such a speech has been made, either by accident or from shame. Mostly it has been, I think, by accident."

"But it isn't always the way. And it's a stupid story from this peacock's way of looking at it."

"For this peacock doesn't do such things. He is too handsome to think of feet—he has enough beauty to think about."

"You're becoming very conceited," said Mrs. Peacock. She wished that she had been able to do the same thing. She hadn't been around—but if she had been she knew she could never have shown such pride and finery as Mr. Peacock. "Yes," she continued, "you mustn't forget that once you killed your young." And Mr. Peacock sadly thought to himself how hard it was to be perfect.

What's Your Definition?

The teacher was explaining to a class of small boys and girls the meaning of the word "collision."

"A collision," she said, "is when two things come together unexpectedly. Now can anyone give me an example of a collision?"

"Twins!" said the Class Idiot.

Reasonable

Teacher—Walter has spelled "assess" correctly; now, Robert, you may tell us what it means.

Bobby—"Assess" means—er—"assess" is a lady donkey."

SAY "BAYER ASPIRIN"—Genuine

Unless you see the "Bayer Cross" on tablets, you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over 25 years for

Colds Headache Neuritis Lumbago

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark of Bayer Manufacture of Monaceticacidester of Salicylicacid

A homing pigeon was the means of discovering the identity of a man found unconscious near Sheffield, England. A German library which is to contain everything published in the German language since 1913 has been established at Leipzig.

Get back that lost weight!

When you start to waste away to a shadow, when the color leaves your cheeks and your poor, tired legs will hardly hold up your weakened body it's high time you started taking a fine tonic and builder like Tanlac.

Tanlac will build you up and make you feel that life's worth living. Made from roots, herbs and bark gathered from the four corners of the earth and compounded under the exclusive Tanlac formula, Tanlac is just what the poor, starved body needs.

First of all it cleanses the blood stream and puts the digestive organs in order. You find, after a few days' treatment, that you want to eat. Pretty soon the welcome color steals back into your cheeks and the scales tell you that you're gaining weight. From then on it's only a short time until you're feeling fit as a fiddle.

Millions of men and women have taken Tanlac with great benefit. More than one hundred thousand people have written us glowing tributes to this wonderful tonic.

When you know it has worked wonders for so many folks it's folly not to take advantage of Tanlac's help yourself. Don't

put it off another day. Get a bottle at your druggist's now and start the good work right away. Take Tanlac Vegetable Pills for constipation.

"I'll tell you why they wouldn't insure you—"

"You allowed constipation to become chronic—until finally it resulted in organic disease."

"People don't realize how insidious constipation is. Its first effects are hardly more than annoyances—headaches, loss of appetite, sleeplessness and the like. But in time, as the body is subjected to continued intestinal poisoning, it may lead to high blood pressure, rheumatism, diabetes or even Bright's disease."

"Stop constipation if you wish to live long. Take a little Nujol every day—that will keep you regular."

Nujol relieves constipation in Nature's way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is safe, gentle and natural in its action. Nujol makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles. Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time. Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

TOPCOATS OF GAY WOOLENS; KNITTED WEAR FOR CHILDREN

WAKE your dreams last night, of living models passing in review, some garbed in handsome topcoats, others in trim tailored suits? No wonder, for it is the time of the calendar when sleep and calm are apt to be disturbed with the harrowing question as to whether it is the better part of wisdom to invest in a smart utility coat or a tailored suit. Both, if the pocket-book will agree, is the answer. Certain it is, that this year in particular, no fashionable wardrobe is complete without an up-to-the-standard topcoat. The vogue for the full-length coat worn over a dainty frock has never been more enthusiastically endorsed.

Topcoats, without a doubt, are a very important and immediate style item. It seems that the long coat is in

Mothers who are sighing for "new worlds to conquer" in the campaign of spring sewing which is usually on at this time of the year, why not try making a dress or so for little daughter of novelty knitted fabric? Knitted woolen and rayon weaves, sold by the yard, are accounted among the most stylish dress materials of the season. A cloth which is receiving considerable attention just now, is of knitted construction resembling tweed in its general appearance.

For children's dresses it is very charming as well as practical. The fact that it is beautifully colorful, makes it especially adaptable to little folks' wear—and then, best of all, it is a change from regulation gingham.

Of Gay Novelty Woollens.

a particularly joyous mood this season. How could it be otherwise, styled as it is of novelty woollens, gay in coloring and striking in either striped, plaided, mottled, checked or tweed patterning.

Colors are considerably varied with pastel tones to the fore. At the same time a brighter shade range is also being featured. The plaid woollens are adorable and most of the coats thereof are fur-collared to blend. The youthful model in the picture is developed in a soft downy plaid of blue and gray, with collar of grisetto

percales and the usual list of wash fabrics. Even the beginner in home dressmaking need have no hesitancy in attempting a frock as simply styled as is the one in the picture. The neckline is bound with a heavy silk braid while the sleeves and hemline are bordered with a loop-knit yarn banding which can be purchased at most every dress trimming counter.

A collection of knitted fabrics which stress the importance of color includes plain jersey in high sports shades and also delicate pastels, preferably peach, rosewood, Nile, ashes of roses, maize

Simply Styled and Pretty.

fur. Set-on pockets and point-at-the-shoulder sleeves are accented style details. The lining of this modish coat is of gray crepe.

Dyed fur is being used in discreet quantity as a trimming for spring coats. A garment of soft green pile fabric is collared with leopard fur which is dyed rust color. This makes quite a stunning wrap.

Brown-striped homespun makes up modishly, maintaining in its styling severe simplicity. Another youthful utility coat of swager lines uses novelty striped camel's hair in its construction. Its collar is of nutria.

absinthe and gold. Oatmeal and biscuit are very appealing while the soft blue shades and green tints are quite the rage.

The two-piece mode can be worked out very attractively, using the new knitted fabrics. One way of doing this is to use solid colored jersey for the skirt, designing the jumper of tweed. Knitted fabrics are easily manipulated. The seams press out without trouble and the home dressmaker is rewarded with a tailored-like appearance of the garment.

GOOD THINGS WE LIKE

When eggs are plentiful and reasonable in price is the time to serve them freely. A poached egg on toast that has been well toasted and buttered is a breakfast dish which will appeal to almost any appetite. For a supper or luncheon dish an omelet or scrambled eggs will be liked.

Curried Eggs.—Cut three, hard-cooked eggs into eighths lengthwise. Melt two and one-half tablespoons of butter, stir until well blended, then pour on gradually, while stirring constantly, one cupful of milk. Bring to the boiling point and add one-third of a teaspoonful of salt, a dash of pepper and one-half teaspoonful of curry powder; then add the eggs. Turn into a shallow buttered dish, sprinkle with one-fourth of a cupful of grated cheese, cover with three-fourths of a cupful of buttered crumbs and bake until brown.

Vassar Eggs.—Finely chop two ounces of smoked dried beef. Add one cupful of tomatoes, one-fourth cupful of grated cheese, a few drops of onion juice, a few grains each of cayenne and cinnamon. Melt two tablespoons of butter, add the mixture and when well heated, add three beaten eggs. Cook until the eggs are creamy, stirring constantly. Serve on squares of buttered graham toast.

Hot Egg Sandwiches.—Mince a tablespoonful of shredded onion and add to a tablespoonful of butter in a frying pan; when hot and partly cooked add an egg, fry until cooked and place on a piece of bread which has been warmed—not toasted; cover with another warmed slice well buttered and serve. An egg sandwich and a glass of hot milk or cocoa will make a good meal.

Hard-cooked eggs, chopped while warm, mixed with butter and a little mustard to season with salt to taste, make a most satisfying sandwich for any occasion.

Use Corn.—Now is the time for all good cooks to come to the aid of their country, by using plenty of corn—corn meal dishes, such as corn-meal mush, corn breads, corn and suet puddings, spoon bread and many other good things which will be easy to find.

Everyday Good Things.

Those who are fond of sweet potatoes will like this recipe:

Sugared Sweet Potatoes.—Select medium-sized sweet potatoes, pare and slice. Place these in a buttered dish—a casserole is best; add one and one-half cupfuls of water (boiling hot) and sprinkle with one teaspoonful of salt and four tablespoons of maple sugar; dot with bits of butter, using four tablespoons. Bake 30 minutes and then set into a pan of hot water to wait for serving time.

Eggs in Spinach Nests.—Prepare six rounds of toast, butter well and cover each round with cooked and seasoned spinach, making a hollow in the center. Drop an egg into the hollow of each nest and place the dish in the oven until the eggs are cooked. Sprinkle with paprika, dot with butter and sprinkle with chopped ham.

Cheese Sandwich Filling.—Prepare a white sauce, using two tablespoons each of butter and flour and one-half cupful of milk. Put one-half of a can of pimientos, two hard-cooked eggs, and one-half pound of cheese through the meat grinder; add one raw egg, one tablespoonful each of sugar and one teaspoonful of salt, with one-half cupful of vinegar. Cook over water until smooth and thick, after combining mixtures. Cool and use as sandwich filling for white bread.

Betrothal Sandwiches.—Cut white bread into one-fourth inch slices. Shape with a heart cutter, spread with pimento butter, put together in pairs, press edges lightly and decorate with small hearts cut from pimientos, using the small vegetable cutter for this purpose.

Prune Relish.—Boil together one cupful of stoned and finely cut prunes with one and one-half cupfuls of water in which they have been soaking; add three tablespoons of sugar, the juice of half an orange, one-half teaspoonful of ground cinnamon and two tablespoons of currant jelly. Cook all together, adding the orange juice and jelly at the last. This makes a fine relish to serve with mutton or lamb, or with sliced cold roast. Raisins may be used with the prunes if desired, adding a different flavor. Prunes are one of our versatile fruits. They add to many dishes. A little prune pulp added to boiled frosting makes a delicious cake filling. Cooked with a bit of flour, lemon juice and a few raisins, the filling is especially good for filled cookies.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

T. Warren is sporting a new Hudson sedan.

Andy's Meat Market, in Oceanview, burned to the ground early Tuesday morning.

Work is progressing rapidly on H. H. Smith's new yard at Mission and Hillside boulevard.

Mr. Harmon, of Peoria street, who was very sick, is now improving and on the road to recovery.

Mrs. Bleasdale, of Brunswick street, entertained a number of friends at a dinner at her home Sunday evening.

J. J. Kennedy, superintendent of waterworks, reports excellent progress on the new well at Citrus and Niantic avenue.

Mrs. Hayes, president of the South of Market Club, was entertained by Mrs. A. Chesney, of Crocker avenue, Thursday of last week.

The water clerk's office in the City Hall is being remodeled.

The baby son of Mr. and Mrs. T. Fitzgerald was baptized Sunday at the St. Maximus church.

Mrs. Emma Nelson, of 20 San Pedro avenue, was married last Tuesday to Mr. Thomas Wouldhave, of San Jose avenue.

Philip Ross was re-elected vice-president of the San Francisco Fruit Dealers' Association at their meeting last Tuesday evening.

J. P. Murray, of Crocker Tract, is erecting a store on the corner of Roosevelt and Hanover streets. It will soon be completed.

C. Binckley, teacher of English at Jefferson Union high school, was absent from school Monday, due to the death of his nephew.

Fred Kronke, of Templeton avenue, is home again after several weeks at St. Luke's hospital. He was severely injured in an auto accident.

Manager L. M. Reese of the Daly Theatre, accompanied by Mrs. Reese and their son Bobbie, spent the week end in Oroville, visiting relatives.

Mr. and Mrs. H. H. Smith have finished their moving and are now established at 52 Los Olivos avenue, after sixteen years at 211 Los Banos avenue.

Mrs. M. Ratto, of the New San Francisco Auto Camp, is in Monterey visiting her parents. She hopes to bring them back to Daly City. Her mother has been ill recently.

Mayor H. H. Smith has purchased a Chevrolet coupe.

Miss Marge O'Connor has returned to her office after her recent illness.

Mrs. Ruth Warmick underwent an operation last Monday and is recovering.

Monty Power's orchestra gave a social dance in the Daly City auditorium last Tuesday evening.

Miss Tessie O'Connor, of Evergreen avenue, spent the week end with Miss Grace Johnston, of Mission street.

Friends of Mrs. M. Appleton, a pioneer resident of Daly City, are sorry to learn of the recent death of her mother.

Mrs. Meyer, of 207 Los Banos avenue, has returned home after six months at Suissun. She is still quite seriously ill.

The ladies of St. Maximus parish gave a whist last Tuesday evening in the social hall of the church. It was a big success.

Miss Olga Ottoboni, secretary of the Vittoria Colonna Club, attended their annual ball at the Palace Hotel, San Francisco.

Mrs. Parker and daughter Alice, former residents of Daly City, spent the week end with Mrs. Parker's mother, Mrs. Reardon, of 208 Los Banos avenue.

Mrs. H. O'Connor, Mr. and Mrs. W. Fricke and children, Jewel Stewart and Alice Johnson motored to Los Altos last Sunday, where they spent a pleasant day with friends.

F. Martin, of Hanover street, a pioneer resident of Daly City, died last Wednesday evening. He leaves his wife, two daughters, Mrs. D. Johnson and Mrs. Menjou, and his son Valentine.

The Jefferson Union high school will hold a Colonial ball, Friday evening, February 26, in the school auditorium. All those who wish to be present must receive an invitation from some one of the students.

A voice recital will be given by the pupils of Eula Grandberry, for the benefit of the Woodrow Wilson-Vista Grande P. T. A., Saturday evening, February 27, at the Jefferson Union high school auditorium.

There was a false alarm turned in at 1:30 Wednesday morning, at Box 31. Every volunteer fireman in Daly City would like to find the mean jokester who so unnecessarily routed him out of bed at such an hour.

The Knights of Columbus put on a wonderful show last Tuesday evening in the St. Maximus church hall. After the entertainment refreshments were served and everyone who attended report that they spent a very enjoyable evening.

Several months ago Mrs. White, of Theta avenue, had her machine struck by a street car and demolished. Settlement has been made by the car company and now she is driving a Ford coupe. Neither Mrs. White nor Mrs. Taggart, a passenger in the car at the time, were injured in the accident.

H. Ross, former resident of Daly City and brother of P. Ross, suffered a smashed hand while working on the tube under the Oakland estuary. An eight-pound hammer fell on it, injuring it severely. He will recover full use of the hand, although for a time amputation was thought necessary.

The drama, the comedy, the human pathos, as well as the thrills and the excitement in the life of a policeman who has as his beat the dangerous tong war infested district of San Francisco's Chinatown from the basis of "High and Handsome," the most recent production starring Lefty Flynn, which comes to the Daly Theatre next Thursday and Friday.

The Ladies' Auxiliary of the Associated Firemen of San Mateo County held their regular meeting last Tuesday in the Eagles' Hall, Daly City. Mrs. Sick, of San Bruno, was elected temporary president, and Mrs. Grose, of San Carlos, temporary secretary. Following the meeting several hands of whist were played. A join banquet was then held with the Associated Firemen.

The Daughters of Israel of the Congregation B'Nai Israel will install their new officers on Thursday, the installation to be followed by a banquet. The new officers are: Mrs. F. Kanter, president; Mrs. J. Eisenberg, vice-president; Mrs. M. Sherwood, recording and financial secretary; Mrs. B. Nurok, counselor; Mrs. J. Pearlman, Mrs. E. Block and Mrs. Faber, trustees.

A grand ball will be given by Congregation B'Nai Israel on Saturday evening, February 20, at the Daly City Auditorium for the benefit of the repairing of the Synagogue. Union music will be furnished by O'Connor's Synopators. The committee in charge is K. Barskey, chairman; J. Brockman, vice-chairman; S. Rudy, secretary; J. Eisenberg, treasurer; J. Pearlman, M. Cantor, M. Herscovitz, trustees; J. Barskey, floor manager; C. Ruth, secretary.

Tony Modica spent the week end with his father in San Francisco.

Richard Hopman, of St. Helena, is visiting his brother, William Hopman, over the week end.

Several of the young ladies of the El Carmelo Parlor drill team are planning a trip to Truckee for a few days.

Mrs. F. Kanter and son Mark underwent minor operations last Wednesday at the Children's hospital, San Francisco.

Mr. and Mrs. Rannenberg, of 26 Bepler street, have rented their home and are starting East on a trip in their faithful Lizzie.

Company No. 3, Daly City Volunteer Fire Department, will give a whist party at their fire house on Westlake avenue, Tuesday, February 23.

Mrs. Core, of Wilson street, gave a Valentine party in honor of her daughter, Catherine, last Saturday. A number of the smaller folks attended.

A cottage on Los Olivos avenue belonging to Mrs. C. Fish was slightly damaged by fire last Wednesday, but prompt action by the volunteer firemen prevented the fire from gaining headway.

Raymond Vest of 201 Bellevue avenue suffered a painful accident last Tuesday while working on his auto. It fell off a jack, cutting off his right index finger. He went to the Central Emergency hospital, where the finger was sewed in place, and it is now believed he will recover the use of the finger.

At the meeting of Crocker Chapter No. 382, Order of the Eastern Star, last Monday evening, the first initiation of the year was held. A large number of visitors were present, and fifteen Matrons and seventeen Patrons were in attendance, including the Grand Patron of the State of California. Following the initiation one of the largest crowds in the history of the order sat down to the banquet table.

NOTICE OF SALE OF REAL PROPERTY AT PRIVATE SALE

Probate No. 43154
Dept. No. 10.
In the Superior Court of the State of California, in and for the City and County of San Francisco.
In the Matter of the Estate of Jane O'Reilly (also known as Jane M. O'Reilly) Deceased.
NOTICE IS HEREBY GIVEN that the undersigned, Administrator and Administratrix of the estate of Jane O'Reilly, also known as Jane M. O'Reilly, deceased, will, on or after the 23rd day of February, 1926, sell at private sale, for cash, lawful money of the United States, subject to confirmation by the Superior Court of the State of California, in and for the City and County of San Francisco, in the matter of the estate of Jane O'Reilly, also known as Jane M. O'Reilly, (deceased) No. 43154 on the files of said Court, the following described real property:

All that certain lot, piece or parcel of land situate, lying and being in the County of San Mateo, State of California, and bounded more particularly described as follows, to wit: Commencing at the southeasterly corner of the 600-acre tract of land set off to Owen and Patrick McMahon in the final decree of partition dated December 16, 1870, of the San Pedro Rancho, in the suit of James Regan vs. Owen McMahon, et al. (12th District Court Case No. 14540, City and County of San Francisco); thence along the southeasterly line of Buri-Buri Rancho south 31 degrees 20 minutes east 19 chains 70 links, more or less; thence south 44 degrees 15 minutes west 33 chains 62 links, more or less; thence north 31 degrees 20 minutes west 47 chains 41 links, more or less; and thence east 38 chains .07 links, more or less, to the point of commencement. Containing 109.13 acres, more or less.

Bids or offers must be in writing, and may be delivered to the undersigned personally, or be left for them at the office of Messrs. O'Gara & DeMartini, Room 550 Mills Building, northeast corner of Montgomery and Bush Streets, San Francisco, California, or may be filed in the office of the Clerk of the above-entitled Court, to which the return of sale must be made, at any time after the first publication of this notice and before the making of said sale.

TERMS AND CONDITIONS OF SALE: Cash, in lawful money of the United States; ten per cent (10%) of the purchase price to be paid to said administrator and administratrix upon acceptance of bid, and the balance upon confirmation of sale by said Court. Abstract and policy of title insurance, at the expense of purchaser.

Dated: February 2nd, 1926.
M. J. O'REILLY,
CECILIA M. McHUGH,
Administrator and Administratrix of the Estate of Jane O'Reilly, also known as Jane M. O'Reilly, Deceased.
L. E. Prescott; O'Gara & DeMartini, Attorneys for Administrator and Administratrix.
Published in the Daly City Record three times.
First publication February 5, 1926.
Last publication February 19, 1926.

Send \$1.00 for a special 5-months' subscription to SUNSET—the West's Great National Magazine—the clean, up to date monthly for the whole family. Spare-time agents wanted. Address No. 460 Fourth Street, San Francisco, California.

Percy Bronson, the popular young bachelor from San Francisco, was a guest at one of our social functions this week. His charming manner and winning smile make him a welcome guest wherever he goes. Mr. Bronson is known among his wide circle of friends as being one of the most desirable of the eligible young men. He was delighted with our hospitality and expressed the hope that he would be with us again soon.

One of the big thrills in "The Measure of Man," Universal special, coming to the Daly Theatre next Tuesday and Wednesday, is a terrific fight between the star, William Desmond, and Al Smith, the "heavy" of the picture. The fight takes place while the men are waist deep in the waters of Big Lake, where most of the pictures were filmed.

CARD OF THANKS

I wish to extend my thanks to all the school children and their teachers and parents who donated or helped in any way to make the Crocker school playground whist at my home such a wonderful success. I wish to thank the Parent-Teachers' Association for their work and co-operation in assisting, and for the untiring efforts of every one connected with the affair. The sum realized was a little over \$60.

Yours very sincerely,
LILLIAN GUILD LANDINI,
President Crocker Pershing School P. T. A.

Don't Fool With a Bad Cold!

Fully one-half of the serious sickness in this country today started with "just a cold." Old home remedies are good, but not every cold can be cured by the same treatment.

Get Something That is Speedy and Yet Safe

We have in stock a number of the very best Cough, Cold and Bronchial remedies ever offered to the public. We have also prescriptions we can fill upon demand that have cured hundreds of cases.

DON'T TAKE CHANCES
Have a Good Remedy Handy and Start Taking it Before the Lungs Become Affected and the Cold Becomes Something Far More Serious

If you have a cold, cough, croup or any other remedy you favor, bring us the prescription. We will compound it for you satisfactorily.

IT'S GREAT TO HAVE MONEY IN THE BANK

Growth!

"BIG OAKS from little acorns grow." True of individuals. True of Nations. Little could the founders of this Republic have dreamed of the magnitude to which it would attain! Individual and national prosperity "... from little acorns grow." The tiny bank account of today may be the beginning of a substantial fortune of tomorrow. "It's great to have money in the bank."
